

ANIMAL CONTROL STATS

August 2010

WORLD RABIES DAY IS
SEPTEMBER 28, 2010!!!

Let's remember to vaccinate our dogs, cats and pet ferrets against rabies. Rabies is a viral disease that causes acute encephalitis (inflammation of the brain) in warm-blooded animals...even whales!!! World Rabies Day is an excellent time to take steps that can help prevent and control rabies, such as vaccinating pets including dogs and cats and providing education on how to avoid the animals that typically transmit rabies: raccoons, bats, skunks, and foxes. Visit www.worldrabiesday.org for more information.

August and September are usually peak months for arbovirus activity in Texas, so please encourage everyone to take precautions against mosquito bites and reduce mosquito breeding sources. Horse owners should ensure their horses are vaccinated against arboviral encephalitis, especially if they take their horses to other parts of the State.
