

ANIMAL CONTROL STATS September 2010

Tip of the month:

Halloween is coming up! A lot of boys and ghouls will be out trick or treating on October 31st. Keep ALL pets restrained to prevent bites and auto accidents. Cats and dogs can get spooked easily causing them to become excited. This can lead to a “fight or flight” reaction causing the dog to stand its ground and attack, or run like the wind with no regards of who or what is ahead. Have a safe FALL!

	September 2010	September 2009	August 2010

FOOD SAFETY TIP OF THE MONTH:

Never partially cook food for finishing later because you increase the risk of bacterial growth on the food. Bacteria are killed when foods reach a safe internal temperature.

Totals :	103	82	89	62	

Ground equipment capable of producing ULV cold aerosols is available. These machines produce a very tiny droplet of high concentrate insecticide which results in a greater area coverage with less dosage. This type of application is designed to kill active adult mosquitoes and provides little or no residual control. Like the thermal fog generator, the cold aerosol machine should be used during the time the adult mosquito is most active. This means from twilight until about midnight, when atmospheric conditions are usually best (lack of wind).
