Tip of the Month:

Valentine's Day Safety Reminders

- All species of lily are potentially fatal to cats. Symptoms of lily ingestion in cats can be stomach upset, vomiting, or diarrhea.
- Thorns on roses or other flowers can be dangerous for dogs or other pets. Biting, stepping on or swallowing stems with thorns increases risk for a puncture, which can result in serious infections internally or externally.
- Chocolate is toxic to dogs and cats. The darker the chocolate, the more toxic, but dark, milk, semi-sweet and baker's chocolates all can cause adverse reactions. Darker chocolates contain caffeine-like stimulants that cause gastrointestinal, neurologic, and cardiac functions that can cause vomiting/diarrhea, hyperactivity, seizures and elevated heart rate. High fat in lighter chocolates can cause life-threatening inflammation of the pancreas, so make sure to keep the chocolate where pets can't reach it.
- Cocktails also pose a threat to pets. Because of their smaller size, even a small amount of alcohol stolen from a low-sitting glass or lapped off the floor after a spill can cause dramatic problems like vomiting/diarrhea, lack of coordination, central nervous system depression, tremors, difficulty breathing, and even coma.

If you think your pet has been poisoned, contact the Pet Poison Helpline at 1-800-213-6680.

Mosquito Fast Facts

People are not always their favorite target

People are not the primary bloodhosts for mosquitoes, especially in temperate climates. There are few people near the Arctic Circle, for example, but millions and millions of mosquitoes. The major mosquito pests in the Southeast US seem to prefer the host-odor of small herbivorous (vegetarian) mammals, or birds. Mosquitoes that carry encephalitis seem to prefer avian (bird) bloodhosts. These mosquitoes bite people when they get the chance, but they are better at tracking the scent of animals that are most abundant in their habitat.

Recycling Stats

January 2012

There's an "APP" for that!

No really there is an application for recycling and going green. Actually there are many. Here are a few that stand out.

- Green Me – Brought to us by Double Tap Apps, Green Me, is an application that improves your environmental impact of every aspect of life. The bottom line: you create a calendar and list 5 things that you did throughout the day to contribute to being green/environmentally friendly.
- iRecycle – Global Alerts, LLC. provides us with an app that gives you more than 1 million ways to recycle more than 300 materials, plus the latest green news to match your lifestyle. Don't know where to recycle your old t.v., iRecycle finds the nearest drop off location for you!
- Gorgeously Green Survival Guide – This survival guide, brought to us by Optimum Drama, is your virtual "go to girl" with all the advice. Sophie will guide you when shopping for eco friendly choices from lipsticks to light bulbs.

# Represents Pounds Recycled of each product	January 2012	December 2011
