Tip of the Month:

Texas has a law that protects animals from cruel treatment, which includes the confinement of an animal, and the quality of food and water.

With winter upon us, it is important to have a warm and dry place for your pet. A pet door that leads to the garage or laundry room works great. Also, dog houses can be equipped with a two way door that will keep the cold air out.

Even though the temperatures have dropped, water is just as important as food and shelter. Debris may find its way into the water bowl, so remember to change out the water frequently. Strong winds carry debris, and sometimes that debris carries parasites or bacteria. For example, leaves fall off of trees, right? Birds roost in the trees that are covered in leaves. Bird droppings land on the leaves, and that can find its way into your pets food or water supply.

Let's all enjoy the cooler weather and the holidays safely, and drop a bone or some cat nip to your furry friend.

Chemical Contamination: Chemical contaminants are responsible for many cases of foodborne illness. Contamination can come from a variety of substances normally found in restaurants and foodservice establishments. These include toxic metals, pesticides, cleaning products, sanitizers, and lubricants.

Mosquito Management Stats

November 2011

The two main mosquito predators are fish and dragonflies. Gambusia, or mosquitofish, feed on mosquito larvae and are used all over the world to help control mosquito populations. Dragonfly larvae, called nymphs, eat mosquito larvae, and adult dragonflies prey on adult mosquitoes. Some towns in Maine release dragonflies every summer as a natural form of mosquito control.

Sources: The American Mosquito Control Association; the U.S. Centers for Disease Control; the U.S. Department of Agriculture; and, entomology and agriculture departments at the University of California – Davis, Colorado State University, Rutgers University, University of Nebraska, and the University of Florida.

Recycling Stats

November 2011

Here we are folks! It's the last month of the year, Christmas and New Year's Day are creeping up on us, and soon we will be training our muscle memory to write "2012" not "2011."

So, what does that have to do with recycling? What are you going to do with your gifts wrappings, packaging from gifts, instruction manuals, and, of course, the statuesque Douglas Fir that the cat loves to hide in and the dog uses as a chew toy?

You RECYCLE it all!!! With the celebrations and massive feasts, this time of year generates large amounts of trash. Let's remember to do our part and keep it out of the landfill.

Recycling is every Saturday, from 8:00 a.m. to 11:00 a.m. at the Island Baptist Church, 3601 Padre Boulevard.

Recycling will not be available on December 24th or 31st in honor of Christmas and New Year's holidays.

# Represents Pounds Recycled of each product	November 2011	October 2011
Cardboard	3245	1645
Plastic	250	335
Newspaper	895	875
Office Waste	655	830
