## Tip of the Month:

### Happy Healthy Pets

#### NUTRITION

Much like humans, pets need nutritious foods and water several times a day. You should also make sure you are aware of the foods that your pet should not be fed. For example, chocolate and grapes can be deadly for dogs. But that doesn't mean pets can't have treats. Do your homework to find out your pets' favorite treats and dole them out appropriately -- but not too often!

#### EXERCISE

Be sure to give your pet the minimum exercise needed on a daily basis -- as well as some fun free time. For example, a running wheel will give your hamster some efficient cardio, but you also need to give him some time outside the cage to explore the world in a safe environment. In addition to letting your dog outside to "do his business," build some time in your day for a game of Frisbee, or take him jogging with you so you both get your exercise.

#### TRAINING

Before you become an owner of any pet, be sure you are prepared to handle the important process of properly training it. If you are not able to conquer the training process on your own, seek an obedience class that you and your pet can attend together. It's important in all instances that your pet respects you and obeys you. After all, you are the master.

#### SOCIALIZATION

If you are away from the house all day most days of the week, consider a pet day camp where you can drop off your pet to play with other pets. When you can, take your pet to a pet-friendly park or beach to interact with others. Or meet your friends at a pet-friendly restaurant and let your pets play as you and your chums chat it up over appetizers.

#### LOVE

Pets need love just as much as their human counterparts. Make sure you give your pet lots of special attention in the way of pats, tummy rubs, scratches behind the ears and any other affection that your pet craves.

### Mosquito Fast Facts

Remember the “**Four D’s**” for your defense against exposure to West Nile virus infected mosquitoes:

- **DUSK/DAWN** are the times of day you should try to stay indoors. This is when infected mosquitoes are most active.
- **DRESS** in long sleeves and pants when you’re outside. For extra protection, you may want to spray thin clothing with repellent.
- **DEET** (N,N-diethyl-m-toluamide) is an ingredient to look for in your insect repellent. Other approved repellents include picaridin, oil of lemon eucalyptus and IR3535. Follow label instructions and always wear repellent when outdoors.
- **DRAIN** standing water in your backyard and neighborhood - old tires, flowerpots and clogged rain gutters. These are mosquito breeding sites.

For information about West Nile virus in Texas, go to:

[www.dshs.state.tx.us/idcu/disease/arboviral/WestNile/](http://www.dshs.state.tx.us/idcu/disease/arboviral/WestNile/)

# May 2012

***Below are some of the latest facts about recycling:***

- Each person creates about 4.7 pounds of waste every single day
- In the US 33.4% of solid waste is either recycled or composted, 12.6% is burned in combustion facilities and 54% makes it's way into landfills
- Each ton of mixed paper that is recycled can save the energy equivalent to 185 gallons of gasoline
- Recycling 1 ton of aluminum cans conserves the equivalent of 1,665 gallons of gasoline

***Let's do our part and REDUSE, REUSE and RECYCLE!***

# Represents Pounds Recycled of each product	May 2012	April 2012
Cardboard	1270	1060
Plastic	1085	630
Newspaper	140	265
Office Waste	125	255
Tin	60	45
Aluminum	105	55
Totals :	2785	2310
