Follow up on Owners to Vaccinate Pet(s)	1	0	5
Follow up on Quarantine Case	0	5	6
TOTALS	127	100	217

Old Man Winter is knocking on our door and Santa will be coming to town! Cold weather impacts animals...both domestic and wild. Wild animals might look for warm shelter in garages, trash cans or automobiles. Keep your trash cans and garage doors closed all the way. Domestic pets rely on us for shelter, food and water. Just like a hot car can cause harm to pets, cold weather can, too. Even though it is cold, water is still a necessity for pets to remain hydrated. Also, a new year is right around the corner. Check on your pet's vaccination dates and update any information on tags or microchips. Rabies vaccinations are required by State and local laws, other vaccinations are highly encouraged.

## **Recycling Stats November 2013**

**Q:** How or where can I learn about recycling worn out clothing that is too old for Goodwill?

Just because that old shirt you used to love is too threadbare to wear anymore doesn't mean it has to end up in a landfill. "Consumers don't understand that there's a place for their old clothing even if something is missing a button or torn," says Jana Hawley, a professor of textile and apparel management at the University of Missouri-Columbia. "Ninety-nine percent of used textiles are recyclable." Non-profits like Goodwill and the Salvation Army play a crucial role in recycling worn out clothing. When they get donations of clothes that are too threadbare to re-sell in one of their shops, they send them to "rag sorters" that specialize in recycling pieces of fabric large and small. Says Hawley, these textile recyclers sell about half the clothing they get back overseas in developing countries, while unusable garments, especially cotton t-shirts, are turned into wiping and polishing clothes used by a variety of industries and sold to consumers. She adds that other textiles are shredded into fibers used to make new products, such as sound-deadening materials for the automotive industry, archival-quality paper, blankets and even plastic fencing.

## Mosquito Management Stats November 2013

# Represents Amount of Times Preformed	November 2013	November 2012	October 2013
Altosid/BTI (larviciding)	59	38	71
Adulticide Spraying hrs	10	3	13
Scheduled for Adulticide	62	62	62
Landing Rate Counts	17	57	41
Mosquito concerns	3	2	8
Training for Spraying	2	O	0
Work done in chemical room	6	5	3
Totals:	159	156	270

## **Mosquito Fast Facts**

- 1. In the interest of science, Arctic researchers uncovered their chests, arms, and legs and reported as many as 9000 mosquito bites per person, per minute. At this rate, and unprotected human would lose one half of his blood supply in approximately 2 hours.
- 2. Some people are more attractive to mosquitoes than others. It is not clear why, but probably has something to do with the 300 odd chemicals produced by the skin.
- 3. A mosquito can smell the carbon dioxide you exhale from about 60 to 75 feet away.
- 4. Most mosquitoes do not fly very far from their larval habitat, but the salt marsh mosquito migrates 75 to 100 miles over the course of its life.
