<b>TOTALS</b>	<b>157</b>	<b>165</b>	<b>94</b>

Spring Break has arrived! With the increase in vehicle traffic and population, it is important to keep a closer eye on your pet's safety and well-being.

If you see a pet left in a vehicle unattended, please report it. Spring weather feels great, but the cabin of a vehicle may become hot enough to cause irreversible effects on humans and pets.

While enjoying the beach, please take plenty of clean, cool water for your dog, along with a leash, shade and a some food or snacks. Playing on the beach is fun, but dogs get thirsty and require a cool brake.

If you decide to leave the pets alone for the day, leave plenty of toys, food and water available to the them. Dogs will often bark "at the air" or make a mess because they are bored.

Enjoy the cool, then hot, then cool weather!

# Recycling Stats February 2014

## *Out with the old and in with the new telephone books!*

Every year we are given a new telephone book around March. The old phone books are recyclable, and may be recycled at City Hall. There is a blue container, similar to the green residential trash containers, in the lobby just to the left of the main entrance.

Recycling your old phone book not only saves valuable space in landfills, but it also provides reusable material to make new phone books!

We will accept the telephone books during our regular recycling hours from 8:00 a.m. to 11:00 p.m. every Saturday, at 4501 Padre Boulevard (Old City Hall).

# Represents Pounds Recycled of each product	February 2014	January 2014
Cardboard	1,513	1,598
Plastic	1,254	1,078
Paper	2,053	2,791
Tin	248	101
Aluminum	164	130
Totals :	5,232	5,698

Landing Rate Counts	2	0	39
Mosquito concerns	1	1	1
Training for Spraying	6	2	2
Work done in chemical room	4	4	2.5hrs
Totals :	88	83	110

### Mosquito Fast Facts

1. In the interest of science, Arctic researchers uncovered their chests, arms, and legs and reported as many as 9000 mosquito bites per person, per minute. At this rate, and unprotected human would lose one half of his blood supply in approximately 2 hours.
2. Some people are more attractive to mosquitoes than others. It is not clear why, but probably has something to do with the 300 odd chemicals produced by the skin.
3. A mosquito can smell the carbon dioxide you exhale from about 60 to 75 feet away.
4. Most mosquitoes do not fly very far from their larval habitat, but the salt marsh mosquito migrates 75 to 100 miles over the course of its life.

At temporary events, control insects and carefully discard waste. Keep foods covered to protect them from insects. Store pesticides away from food. If you apply insecticides or other pesticides, follow the label directions, avoiding contamination of food, equipment, or other food contact surfaces. Place garbage and paper wastes in a refuse container with a tight-fitting lid. Dispose of wastewater in a sewer or public toilet. Flies and other insects are carriers of foodborne diseases. The chemicals used to kill them can be toxic to humans.
