### Tip of the Month:

With the weather changing, we make changes such as changing the antifreeze in our vehicle, spreading pesticide in our yards, do some spring cleaning, or even stock up on medicines for allergies. These things and many more help our quality of life, but they can hurt our pets.

Common household poisons for pets include:

- •Human medication
- Antifreeze
- Household cleansers
- Rodent poisons
- •Weed killer/insecticide
- Paint and paint solvents
- •Indoor and outdoor plants

Remember to store these items and others in a safe and secure location, use them in areas that will not affect your pet, and dispose of them properly.

Love your pet and it will love you back!

## Recycling Stats April 2014

What do you do with your old magazines? Well, before you recycle them, someone else might want to read them. Call your local library or medical or dental clinics to find out if they would like them. Recycling is good, but reusing is better.

# Represents Pounds Recycled of each product	April 2014	March 2014	
Cardboard	2,909	2,972	
Plastic	1,160	1,615	
Paper	2,953	3,313	
Tin	147	153	
Aluminum	143	228	
Totals:	7,312	8,281	

# Mosquito Management Stats

#### **Mosquito Fast Facts**

- 1. In the interest of science, Arctic researchers uncovered their chests, arms, and legs and reported as many as 9000 mosquito bites per person, per minute. At this rate, and unprotected human would lose one half of his blood supply in approximately 2 hours.
- 2. Some people are more attractive to mosquitoes than others. It is not clear why, but probably has something to do with the 300 odd chemicals produced by the skin.
- 3. A mosquito can smell the carbon dioxide you exhale from about 60 to 75 feet away.
- 4. Most mosquitoes do not fly very far from their larval habitat, but the salt marsh mosquito migrates 75 to 100 miles over the course of its life.

	Total Health Inspections			41	\$1,520.00	

Flies have long been associated with the spread of diseases such as Cholera, Typhoid Fever, Diphtheria and causative agents of Dysentery. These pests have also been shown to transfer the foodborne illnesses caused by E. coli and Salmonella. Taken from: http://foodsafety.ecolab.com/us/food-safety/article?issue=fall-2013&article=fly
