

SIX WAYS TO GO GREEN WITH YOUR PET

1. Make the Safer Choice.

Use eco-friendly products to clean up after your pet.

2. Take a walk.

Instead of driving to the dog park, locate a park or nature trail that is within walking distance.

3. Reuse old bedding and towels.

Use your old towels as rags to clean up your pet's messes or to dry them off after a bath.

4. Pick up pet waste.

Pet waste is a top contributor of bacterial pollution in urban watersheds. Whether you are on a walk or in your own backyard, always pick up your pet's waste.

5. Buy eco-friendly pet toys.

Next time you head to the store for a new toy, look for one made from recycled rubber or other recycled materials

6. Donate items for reuse.

If there are items your pet no longer uses or has grown out of, consider donating them to your local animal shelter to be reused.

Norovirus

Norovirus is one of the leading causes of food poisoning and often results in symptoms similar to the “stomach flu” (such as stomach cramping, nausea, vomiting and diarrhea). Norovirus is a virus that spreads easily by coming in contact with someone who is infected, especially in crowded areas. Foods, drinks and surfaces can also become contaminated with the norovirus, but there are steps that can be taken to help prevent it from spreading.

Sources: Fresh produce, shellfish, ice, fruit, and ready-to-eat foods, especially salads, sandwiches and cookies that have been prepared by someone who is infected.

Prevention: Do not cook, prepare or serve foods or beverages to others while you are sick. Be sure to frequently wash your hands with soap and water for at least 20 seconds. Keep foods and utensils clean by washing all fruits and vegetables, cutting boards, knives, kitchen surface areas, table linens, cloth napkins and even reusable grocery bags.

Recycling Stats May 2017

SIX WAYS TO GO GREEN WITH YOUR PET

1. Make the Safer Choice.

Use eco-friendly products to clean up after your pet. Items with the Safer Choice label contain ingredients that are safer for your family, pets, and the environment.

2. Take a walk.

Instead of driving to the dog park, locate a park or nature trail that is within walking distance. By driving less, you can reduce emissions from your vehicle.

3. Reuse old bedding and towels.

Use your old towels as rags to clean up your pet's messes or to dry them off after a bath. Old bedding or blankets can make great liners for pet crates or beds.

4. Pick up pet waste.

Pet waste is a top contributor of bacterial pollution in urban watersheds. Whether you are on a walk or in your own backyard, always pick up your pet's waste. Even if you aren't near water, stormwater can carry the waste directly into waterways. Pet waste does not make a good fertilizer for your lawn and will not wash away on its own.

5. Buy eco-friendly pet toys.

Next time you head to the store for a new toy, look for one made from recycled rubber or other recycled materials.

6. Donate items for reuse.

If there are items your pet no longer uses or has grown out of, consider donating them to your local animal shelter to be reused. This keeps items like crates, beds, sheets, towels, and toys out of our landfills and helps other pets in need!

Tips to Prevent Mosquito Bites

Using the right insect repellent and other preventive actions can discourage mosquitoes, ticks and other biting insects from landing on you. Here are tips for other preventive actions you can take against mosquitoes.

Remove Mosquito Habitats

- Eliminate standing water in rain gutters, old tires, buckets, plastic covers, toys, or any other container where mosquitoes can breed.
- Empty and change the water in bird baths, fountains, wading pools, rain barrels, and potted plant trays at least once a week to destroy potential mosquito habitats.
- Drain or fill temporary pools of water with dirt.
- Keep swimming pool water treated and circulating.

Use Structural Barriers

- Cover all gaps in walls, doors, and windows to prevent mosquitoes from entering.
- Make sure window and door screens are in good working order.
- Completely cover baby carriers and beds with netting.

Avoid Getting Bitten

- Keep mosquitoes away from exposed skin by wearing long-sleeved shirts, long pants, and socks.
- Tuck shirts into pants and pants into socks to cover gaps in your clothing where mosquitoes can get to your skin.
- Stay indoors at sunrise, sunset, and early in the evening when mosquitoes are most active.
