

SIX WAYS TO GO GREEN WITH YOUR PET

1. Make the Safer Choice.

Use eco-friendly products to clean up after your pet.

2. Take a walk.

Instead of driving to the dog park, locate a park or nature trail that is within walking distance.

3. Reuse old bedding and towels.

Use your old towels as rags to clean up your pet's messes or to dry them off after a bath.

4. Pick up pet waste.

Pet waste is a top contributor of bacterial pollution in urban watersheds. Whether you are on a walk or in your own backyard, always pick up your pet's waste.

5. Buy eco-friendly pet toys.

Next time you head to the store for a new toy, look for one made from recycled rubber or other recycled materials

6. Donate items for reuse.

If there are items your pet no longer uses or has grown out of, consider donating them

Toxoplasma gondii

Toxoplasma is a parasite that causes toxoplasmosis — a disease that can result in serious health problems in individuals who are at high risk for food poisoning: pregnant women, infants, older adults and people with weakened immune systems. Symptoms can be similar to the “flu” and include swollen lymph glands or muscle aches and pains that last for months. Other symptoms affect the eyes causing vision to be reduced or blurred or cause pain, redness or tearing in the eyes.

Sources: Eating undercooked, contaminated meat or using utensils or cutting boards that have had contact with raw meat; coming into contact with feces from an infected cat when cleaning the litter box; or drinking contaminated water. It can also be spread to infants if a mother has become infected before or while pregnant.

Prevention: Cook food to safe temperatures—a food thermometer should be used to ensure food has reached a safe temperature. Also, freeze meat properly; wash fruits and vegetables before peeling, cutting, and eating; avoid unpasteurized dairy products; maintain clean cutting boards; and always wash your hands with soap and water. In addition, use extra caution (such as wearing gloves) when cleaning a cat’s litter box or touching soil in case it is contaminated with cat feces, especially if pregnant or are at a higher risk of getting sick.

HOW TO DECODE YOUR PLASTIC

Most recycling programs accept some, but not all, types of plastic. Be sure to recycle only those plastics collected by your local program!

1 (PETE or PET)

- Water, soda, and juice bottles
- Peanut butter, salad dressing, and jelly jars

2 (HDPE)

- Microwavable food trays
- Single-use shopping bags
- Bottles for cleaners, shampoo, and detergent
- Cereal box liners

3 (Vinyl)

- Deli and meat wrap
- Pipes, siding, fencing, and railing

4 (LDPE)

- Shrink wrap
- Bags for produce, bread, and frozen foods
- Container lids

5 (PP)

- Yogurt tubs
- Medicine bottles
- Reusable containers

6 (PS)

- Takeout containers
- Packing peanuts
- Disposable cutlery and cups

7 (Other)

- Reusable water bottles
- Oven-baking bags
- Citrus juice containers

Tips to Prevent Mosquito Bites

Using the right insect repellent and other preventive actions can discourage mosquitoes, ticks and other biting insects from landing on you. Here are tips for other preventive actions you can take against mosquitoes.

Remove Mosquito Habitats

- Eliminate standing water in rain gutters, old tires, buckets, plastic covers, toys, or any other container where mosquitoes can breed.
- Empty and change the water in bird baths, fountains, wading pools, rain barrels, and potted plant trays at least once a week to destroy potential mosquito habitats.
- Drain or fill temporary pools of water with dirt.
- Keep swimming pool water treated and circulating.

Use Structural Barriers

- Cover all gaps in walls, doors, and windows to prevent mosquitoes from entering.
- Make sure window and door screens are in good working order.
- Completely cover baby carriers and beds with netting.

Avoid Getting Bitten

- Keep mosquitoes away from exposed skin by wearing long-sleeved shirts, long pants, and socks.
- Tuck shirts into pants and pants into socks to cover gaps in your clothing where mosquitoes can get to your skin.
- Stay indoors at sunrise, sunset, and early in the evening when mosquitoes are most active.
