

Animal safety Holiday Safety Tips

Be Careful with Seasonal Plants and Decorations

•Oh, Christmas Tree:
Securely anchor your Christmas tree so it doesn't tip and fall, causing possible injury to your pet. This will also prevent the tree water—which may contain fertilizers that can cause stomach upset—from spilling. Stagnant tree water is a breeding ground for bacteria, and your pet could end up with nausea or diarrhea should he imbibe.

•Avoid Mistletoe & Holly:
Holly, when ingested, can cause pets to suffer nausea, vomiting and diarrhea. Mistletoe can cause gastrointestinal upset and cardiovascular problems. And many varieties of lilies can cause kidney failure in cats if ingested. Opt for just-as-jolly artificial plants made from silk or plastic, or choose a pet-safe bouquet.

Recycling Stats

December 2017

Economic & Environmental Recycling Benefits and Facts

- Well-run recycling programs cost less to operate than waste collection, landfilling, and incineration.
- The more people recycle, the cheaper it gets.
- Well-designed programs save money.
- Recycling helps families save money, especially in communities with pay-as-you-throw programs.
- Every ton of paper that is recycled saves 17 trees.
- Recycled paper supplies more than 37% of the raw materials used to make new paper products in the U.S. Without recycling, this material would come from trees. Every ton of newsprint or mixed paper recycled is the equivalent of 12 trees. Every ton of office paper recycled is the equivalent of 24 trees.
- Recycling conserves natural resources, such as timber, water, and minerals.

Tips to Prevent Mosquito Bites

Using the right insect repellent and other preventive actions can discourage mosquitoes, ticks and other biting insects from landing on you. Here are tips for other preventive actions you can take against mosquitoes.

Remove Mosquito Habitats

- Eliminate standing water in rain gutters, old tires, buckets, plastic covers, toys, or any other container where mosquitoes can breed.
- Empty and change the water in bird baths, fountains, wading pools, rain barrels, and potted plant trays at least once a week to destroy potential mosquito habitats.
- Drain or fill temporary pools of water with dirt.
- Keep swimming pool water treated and circulating.

Use Structural Barriers

- Cover all gaps in walls, doors, and windows to prevent mosquitoes from entering.
- Make sure window and door screens are in good working order.
- Completely cover baby carriers and beds with netting.

Avoid Getting Bitten

- Keep mosquitoes away from exposed skin by wearing long-sleeved shirts, long pants, and socks.
- Tuck shirts into pants and pants into socks to cover gaps in your clothing where mosquitoes can get to your skin.
- Stay indoors at sunrise, sunset, and early in the evening when mosquitoes are most active.
