Animal safety Holiday Safety Tips

Be Careful with Seasonal Plants and Decorations

•Oh, Christmas Tree:
Securely anchor your Christmas tree so it doesn't tip and fall, causing possible injury to your pet. This will also prevent the tree water—which may contain fertilizers that can cause stomach upset—from spilling. Stagnant tree water is a breeding ground for bacteria, and your pet could end up with nausea or diarrhea should he imbibe.

•Avoid Mistletoe & Holly:
Holly, when ingested, can cause pets to suffer nausea, vomiting and diarrhea. Mistletoe can cause gastrointestinal upset and cardiovascular problems. And many varieties of lilies can cause kidney failure in cats if ingested. Opt for just-as-jolly artificial plants made from silk or plastic, or choose a pet-safe bouquet.

Campylobacter

Campylobacter is also a common cause of diarrhea in the United States. Most cases of campylobacteriosis, the infection caused by Campylobacter bacteria, are associated with eating raw or undercooked poultry and meat or from cross-contamination of other foods by these items. Freezing reduces the number of Campylobacter bacteria on raw meat but will not kill it completely, so proper heating of foods is still important.

Sources: Consuming raw and undercooked poultry and other meats, unpasteurized dairy products and untreated water or contaminated produce.

Prevention: Cook all foods thoroughly, prevent cross-contamination by using separate cutting boards when handling raw and cooked foods, don't drink unpasteurized milk or untreated water and wash hands frequently. Wash raw fruit and vegetables before peeling, cutting or eating.

“I Love SPI” 2018

The City of South Padre Island (SPI) is asking the community to love the Island this Valentine’s Day. The City, in partnership with Republic Services is promoting the “I Love SPI” campaign to help residents get involved in maintaining the Island’s natural beauty by adding extra brush and bulky item pick-up services to the regular monthly service. Environmental Health Director Victor Baldovinos stated “people caught participating in the campaign may be awarded an “I love SPI” t-shirt and Milkweed seeds, to help promote Monarch Butterflies on our beautiful Island.”

During the campaign, which will run up to February 13th, residents may place brush and bulky items at the front of the property for collection without facing imposed fines. So, take advantage and clear your yard and house of unnecessary debris and items. Mow and trim around fences, concentrating on the back of the properties (utility easements). Trim your trees and plants to spruce up SPI in preparation for the busy season. Your property will look better and your home will be safer from brush fires and other hazards.

Tips to Prevent Mosquito Bites

Using the right insect repellent and other preventive actions can discourage mosquitoes, ticks and other biting insects from landing on you. Here are tips for other preventive actions you can take against mosquitoes.

Remove Mosquito Habitats

- Eliminate standing water in rain gutters, old tires, buckets, plastic covers, toys, or any other container where mosquitoes can breed.
- Empty and change the water in bird baths, fountains, wading pools, rain barrels, and potted plant trays at least once a week to destroy potential mosquito habitats.
- Drain or fill temporary pools of water with dirt.
- Keep swimming pool water treated and circulating.

Use Structural Barriers

- Cover all gaps in walls, doors, and windows to prevent mosquitoes from entering.
- Make sure window and door screens are in good working order.
- Completely cover baby carriers and beds with netting.

Avoid Getting Bitten

- Keep mosquitoes away from exposed skin by wearing long-sleeved shirts, long pants, and socks.
- Tuck shirts into pants and pants into socks to cover gaps in your clothing where mosquitoes can get to your skin.
- Stay indoors at sunrise, sunset, and early in the evening when mosquitoes are most active.
