### City issues storm update

We are happy to report that the berms the Shoreline Department built for the storm held overnight. We had very high surge starting at 3 a.m. Also high wave action.

Now the surge is receding and we are told it will move out significantly - exposing areas in the bay typically underwater. This is expected.

Winds are picking up - gusting up to 43 mph so far. The causeway remains open, but will be closed once winds are sustained at 45 mph.
