

Mosquito Management Stats

April 2015

# Represents Amount of Times Performed	April 2015	March 2015	April 2014
Altosid/BTI (larviciding)	60	279	25
Adulticide Spraying hrs	14	26	0
Scheduled for Adulticide	62	62	62
Landing Rate Counts	40	12	5
Mosquito concerns	1	1	1
Training for Spraying	0	0	10
Work done in chemical room	8	6	10
Totals :	185	386	113

Mosquito Fast Facts

1. In the interest of science, Arctic researchers uncovered their chests, arms, and legs and reported as many as 9000 mosquito bites per person, per minute. At this rate, and unprotected human would lose one half of his blood supply in approximately 2 hours.
2. Some people are more attractive to mosquitoes than others. It is not clear why, but probably has something to do with the 300 odd chemicals produced by the skin.
3. A mosquito can smell the carbon dioxide you exhale from about 60 to 75 feet away.
4. Most mosquitoes do not fly very far from their larval habitat, but the salt marsh mosquito migrates 75 to 100 miles over the course of its life.
