With the weather changing, we make changes such as changing the antifreeze in our vehicle, spreading pesticide in our yards, do some spring cleaning, or even stock up on medicines for allergies. These things and many more help our quality of life, but they can hurt our pets.

Common household poisons for pets include:

- Human medication
- Antifreeze
- Household cleansers
- Rodent poisons
- Weed killer/insecticide
- Paint and paint solvents
- Indoor and outdoor plants

Remember to store these items and others in a safe and secure location, use them in areas that will not affect your pet, and dispose of them properly.

*Love your pet and it will love you back!*
