

SIX WAYS TO GO GREEN WITH YOUR PET

1. Make the Safer Choice.

Use eco-friendly products to clean up after your pet.

2. Take a walk.

Instead of driving to the dog park, locate a park or nature trail that is within walking distance.

3. Reuse old bedding and towels.

Use your old towels as rags to clean up your pet's messes or to dry them off after a bath.

4. Pick up pet waste.

Pet waste is a top contributor of bacterial pollution in urban watersheds. Whether you are on a walk or in your own backyard, always pick up your pet's waste.

5. Buy eco-friendly pet toys.

Next time you head to the store for a new toy, look for one made from recycled rubber or other recycled materials

6. Donate items for reuse.

If there are items your pet no longer uses or has grown out of, consider donating them to your local animal shelter to be reused.

Listeria monocytogenes

Eating food contaminated with *Listeria monocytogenes* bacteria causes listeriosis—a serious infection that primarily affects individuals who are at a high risk for food poisoning: older adults, pregnant women, young children and people with weakened immune systems. *Listeria* can grow at refrigerator temperatures where most other bacteria cannot.

Causes: *Listeria* is found in refrigerated, ready-to-eat foods, such as hot dogs and deli meats, unpasteurized milk and dairy products, and raw and undercooked meat, poultry and seafood.

Prevention: Cook all foods to proper temperatures and reheat pre-cooked foods to 165°F; wash raw fruit and vegetables before peeling, cutting or eating; separate uncooked meats and poultry from foods that are already cooked or ready-to-eat; wash hands thoroughly; store foods safely at appropriate temperatures; and maintain a clean refrigerator, kitchen area and wash reusable grocery totes regularly.

Recycling Stats April 2017

Reducing and Reusing Basics

The most effective way to reduce waste is to not create it in the first place. Making a new product requires a lot of materials and energy - raw materials must be extracted from the earth, and the product must be fabricated then transported to wherever it will be sold. As a result, reduction and reuse are the most effective ways you can save natural resources, protect the environment and save money.

Benefits of Reducing and Reusing

- Prevents pollution caused by reducing the need to harvest new raw materials
- Saves energy
- Reduces greenhouse gas emissions that contribute to global climate change
- Helps sustain the environment for future generations
- Saves money
- Reduces the amount of waste that will need to be recycled or sent to landfills and incinerators
- Allows products to be used to their fullest extent

Represents Pounds Recycled of each product	April 2017	March 2017
Plastic #1	1,080	1,095
Alum/Tin	325	423
Cardboard	2,070	1,525
Paper	3,715	1,480
Light Bulbs	68	56
Ink Cartridges	30	6
Bottle Caps	47	60
Totals	7,335	4,645

Work done in chemical room	39	10
Totals :	253	401

Tips to Prevent Mosquito Bites

Using the right insect repellent and other preventive actions can discourage mosquitoes, ticks and other biting insects from landing on you. Here are tips for other preventive actions you can take against mosquitoes.

Remove Mosquito Habitats

- Eliminate standing water in rain gutters, old tires, buckets, plastic covers, toys, or any other container where mosquitoes can breed.
- Empty and change the water in bird baths, fountains, wading pools, rain barrels, and potted plant trays at least once a week to destroy potential mosquito habitats.
- Drain or fill temporary pools of water with dirt.
- Keep swimming pool water treated and circulating.

Use Structural Barriers

- Cover all gaps in walls, doors, and windows to prevent mosquitoes from entering.
- Make sure window and door screens are in good working order.
- Completely cover baby carriers and beds with netting.

Avoid Getting Bitten

- Keep mosquitoes away from exposed skin by wearing long-sleeved shirts, long pants, and socks.
- Tuck shirts into pants and pants into socks to cover gaps in your clothing where mosquitoes can get to your skin.
- Stay indoors at sunrise, sunset, and early in the evening when mosquitoes are most active.
