

ANIMAL CONTROL STATS December 2010

Happy New Year to all!

Dental health is just as important for your pet as it is for us. Not only will you avoid dog breath, but you will avoid tooth decay, and unsightly plaque and tarter build up.

Dental kits are available at your favorite pet supply store, or most veterinarians and groomers provide the dental cleaning service.

Recycling Stats

December 2010

# Represents Pounds Recycled of each product	December 2010
Cardboard	544
Plastic	401
Newspaper	1,681
Tin	253
Aluminum	41
Totals :	2,920

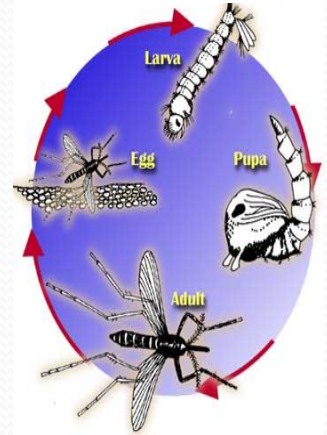

EASY RECYCLING TIPS

1. Find a convenient place to collect recyclable items. Most things come from the kitchen, making it a good spot to set up a recycling center.
2. The great thing about recycling is that it lets you put your favorite old containers, bins, or baskets to use. Assign containers for glass, plastic, and aluminum. To avoid messes, choose solid containers for storing items such as glass jars or cans that may have a sticky residue.
3. Take leftover plastic bags back to grocery stores where they are collected and reused to make plastic lumber.
4. Check the bottom of plastic items to identify what type of plastic they are. If the type is not recycled at your local center, consider ways to reuse the container.
5. Save water and time when recycling cans and bottles. You no longer need to rinse them out or remove their labels.
6. Recycle junk mail or reuse it as scratch paper. To opt-out of certain junk-mailing lists, go to opt-out.cdt.org.
7. Newspapers, magazines, and white paper can all be recycled as long as the paper is clean and dry. Plastic wrap, stickers, or rubber bands should be removed, but staples and plastic window envelopes are OK.
8. Recycle worn-out rechargeable batteries like those used in cell phones, computers, or power tools. Go to www.rbrc.org to find a drop-off location in your area.
9. Divvy up recycling duties among family members and sort items on a daily basis.
10. Print out [this list](#) of commonly recycled materials. Post it where you recycle for easy access.

Mosquito Management Stats

December 2010

# represents amount of times preformed	December 2010	November 2010	October 2010
Altosid/BTI (larviciding)	9	13	223
Anvil 2+2 (adulticide)	0	4	14
Scheduled for Adulticide	0	12	23
Landing Rate Counts	0	70	33
Larval counts	0	0	20
Mosquito concerns	0	3	12
Work done in Chemical room	6	4	11
Totals :	15	106	336

Tip of the Month

"Some of the best mosquito control systems in the world are found in nature. Many [animals](#) and insects eat mosquitoes (such as bats, toads, insectivorous birds, and dragonflies).

Bats are especially voracious mosquito eaters. You can purchase "bat houses" to hang in trees or other appropriate locations where mosquitoes are a problem. These houses will lure bats in, giving them a place to rest during the day and allowing them to hunt [pests](#) at night."
