ANIMAL CONTROL STATS January 2011 The 10 Canine Commandments

- My life is likely to last 10 to 15 years. Any separation from you will be painful to me. Remember that before you buy me.
- 2. Give me time to understand what you want from me.
- 3. Place your trust in me. It's crucial to my well-being.
- Dont be angry with me for long, and don't lock me up as punishment. You have your work, your entertainment and your friends. I only have you.
- Talk to me sometimes. Even if I don't understand your words, I understand your voice when it's speaking to me.
- 6. Be aware that however you treat me, I'll never forget it.
- Remember before you hit me: I have teeth that could easily crush the bones of your hand, but I choose not to bite you.
- Before you scold me for being un-cooperative, obstinate or lazy, ask yourself if something might be bothering me. Perhaps I'm not getting the right food, or I've been out in the sun too long, or my heart is getting old and weak.
- 9. Take care of me when I get old. You too will grow old.
- 10. Go with me on difficult journeys. Never say: "I can't bear to watch it", or "Let it happen in my absence." Everything is easier for me if you are there.

REMEMBER THAT I LOVE YOU.

When You Reheat Food. Heat cooked, commercially vacuum-sealed, ready-to-eat foods, such as hams and roasts, to 140°F. Foods	TEXAS				ISLAND, IEXAS

When You Reheat Food. Heat cooked, commercially vacuum-sealed, ready-to-eat foods, such as hams and roasts, to 140°F. Foods that have been cooked ahead and cooled should be reheated to at least 165°F. Reheat leftovers thoroughly to at least 165°F. Reheat sauces, soups, and gravies to a boil. USDA Food Safety and Inspection Service, Cooking For Groups, July 2007

Question of the Month <u>**Question:**</u> Where Do Mosquitoes Go in Winter?

Answer: Believe it or not, the mosquitoes are out there, even in winter. They're just hiding so we don't notice them. Absent unseasonably warm weather, mosquitoes remain inactive through the winter months.

Some mosquitoes lay winter hardy eggs which lie dormant in the soil until spring. In late summer or fall, the female mosquito lays her eggs singly in areas where the ground is moist. The eggs hatch when conditions become favorable again, usually in the spring when temperatures begin to rise and sufficient rain falls.
