

Animal safety facts

- Injuries caused by animals are the second most frequent cause of emergency room visits each year.
- There are 5+ million incidents involving animals annually.
- 70% of dog bites are to children under 10 years of age, and 77% of the bites are to the facial area.
- 77% of dog bites are from dogs owned by family and friends and take place in a familiar area.
- 65% of serial attacks and 79% of rampage attacks (biting multiple people during one occurrence) are committed by Pit Bull breeds and Rottweilers.

Food Poisoning

Food poisoning (also known as foodborne illness or foodborne disease) is any illness that results from eating contaminated food.

Causes

Harmful bacteria are the most common cause of food poisoning, but there are many other causes, including the following:

- Bacteria and Viruses
- Molds, Toxins, and Contaminants
- Parasites
- Allergens

Long-Term Effects

One in six Americans will get sick from food poisoning this year. Most of them will recover without any lasting effects from their illness. For some, however, the effects can be devastating and even deadly.

Serious long-term effects associated with several common types of food poisoning include:

- Kidney failure
- Chronic arthritis
- Brain and nerve damage
- Death

Who's at Risk

Certain groups of people are more susceptible to foodborne illness. This means that they are more likely to get sick from contaminated food and, if they do get sick, the effects are much more serious. These groups include:

- Pregnant women
 - Older adults
 - Persons with chronic illnesses

Recycling Stats September 2017

Miscellaneous Recycling Facts

Represents Pounds Recycled of each product	September 2017	August 2017
Plastic #1	1,150	865
Alum/Tin	558	165
Cardboard	1,385	1,200
Paper	845	906
Light Bulbs	50	25
Ink Cartridges	18	18
Bottle Caps	37	26
Batteries	0	45
Totals	4,043	3,250

Brush	96 tons
-------	---------

- On average, each one of us produces 4.4 pounds of solid waste each day. This adds up to almost a ton of trash per person, per year.

- An estimated 80,000,000 Hershey's Kisses are wrapped each day, using enough aluminum foil to cover over 50 acres of space -- that's almost 40 football fields. All that foil is recyclable, but not many people realize it.
- Rainforests are being cut down at the rate of 100 acres per minute!
- A single quart of motor oil, if disposed of improperly, can contaminate up to 2,000,000 gallons of fresh water.
- Motor oil never wears out, it just gets dirty. Oil can be recycled, re-refined and used again, reducing our reliance on imported oil.
- A typical family consumes 182 gallons of soda, 29 gallons of juice, 104 gallons of milk, and 26 gallons of bottled water a year. That's a lot of containers -- make sure they're recycled!

September 2017

Mosquito

Management Stats

# Represents Amount of Times Performed	September 2017	September 2016
Altosid/BTI (larviciding)	256	173

Scheduled for Adulticide	140	120
Landing Rate Counts	30	34
Mosquito concerns	5	7
Training for Spraying	3	5
Work done in chemical room	22	19
Totals :	486	378

Tips to Prevent Mosquito Bites

Using the right insect repellent and other preventive actions can discourage mosquitoes, ticks and other biting insects from landing on you. Here are tips for other preventive actions you can take against mosquitoes.

Remove Mosquito Habitats

- Eliminate standing water in rain gutters, old tires, buckets, plastic covers, toys, or any other container where mosquitoes can breed.
- Empty and change the water in bird baths, fountains, wading pools, rain barrels, and potted plant trays at least once a week to destroy potential mosquito habitats.
- Drain or fill temporary pools of water with dirt.
- Keep swimming pool water treated and circulating.

Use Structural Barriers

- Cover all gaps in walls, doors, and windows to prevent mosquitoes from entering.
- Make sure window and door screens are in good working order.
- Completely cover baby carriers and beds with netting.

Avoid Getting Bitten

- Keep mosquitoes away from exposed skin by wearing long-sleeved shirts, long pants, and socks.
- Tuck shirts into pants and pants into socks to cover gaps in your clothing where mosquitoes can get to your skin.
- Stay indoors at sunrise, sunset, and early in the evening when mosquitoes are most active.
