

ANIMAL CONTROL STATS

February 2011

Well Spring Break is here and we are expecting to have a good crowd.

Whether you are a permanent resident or a visitor to the Island, your pet's safety is important. There will be a lot of traffic on the street, so mind your pet cats and keep them safe from vehicles. Let's keep an extra eye out for pets being stored in parked vehicles while the owners are shopping or enjoying the beach. Remember, keep plenty of water for your pet if you are at the beach.

When You Keep Food Hot. Once food is cooked or reheated, it should be held hot, at or above 140°F. Food may be held in oven or on serving line in heated chafing dishes, or on preheated steam tables, warming trays, and/or slow cookers. Always keep hot food hot. (USDA Food Safety and Inspection Service, Cooking For Groups, July 2007)

Question of the Month
Question: Does salt relieve itchy mosquito bites?

Answer: Believe it or not, the best way to treat a mosquito bite: lick the end of your finger to wet it then pour salt on it. Rub this onto the bite. This supplies sodium to the site as well as "scratching" it. Leave it alone (with the small amount of salt and moisture from your saliva) and forget about it. My grandfather told me this as a kid some 45 years ago. Trust me, it works 100% every time. Try it yourself and see. Also, if you ever get poison ivy or sumac poisoning on your skin there is a product that is absolutely a life saver. It's called "Tecnu" and it saved me from a horrible sumac case on my legs.
