TIP OF THE MONTH:

HOT DOG!!!

Not the Chicago style, but the four legged kind left in the parked vehicle in the parking lot.

A 78° day here is nice, but if you are in a parked car without shaded parking, the temperatures can climb up to 120° within 30 minutes!

So what do you do if you see a dog in a car that may be in danger of heat stroke?

- Record the vehicle's information (license number, make, model and color).
- Alert the management of the business.
- Call Animal Control or Police.
- Remain with the dog until help arrives.

SIGNS OF HEAT STROKE:

- Heavy Panting
- Profuse Salivation
- Rapid Pulse
- Red Gums and Tongue
- Lethargy
- Lack of Coordination
- Vomiting
- Diarrhea

Mosquito Fast Facts

TOP 10 MOSQUITO FUN FACTS

10. An adult mosquito can live as long as 5 months. It may take several months for a larva to develop to the adult stage in cold water. Eggs of floodwater mosquitoes may remain dormant for several years, and hatch when they are covered with water.
9. An adult female mosquito weighs only about 1/15,000 ounce (about 2.0 milligrams).
8. An adult female mosquito consumes about 5-millionths of a liter in a single blood meal.
7. A mosquito wing beats from 300 to 600 times per second.
6. Male mosquitoes find female mosquitoes by listening to the sound of their wings beating. The males can actually identify the correct species by the pitch of the female's wings.
5. Mosquitoes can fly about 1 to 1.5 miles per hour.
4. Most mosquitoes do not fly very far from their larval habitat, but the salt marsh mosquito migrates 75 to 100 miles over the course of its life.
3. A mosquito can smell the carbon dioxide you exhale from about 60 to 75 feet away.
2. Some people are more attractive to mosquitoes than others. It is not clear why, but probably has something to do with the 300 odd chemicals produced by the skin.
1. In the interest of science, Arctic researchers uncovered their chests, arms, and legs and reported as many as 9000 mosquito bites per person, per minute. At this rate, and unprotected human would lose one half of his blood supply in approximately 2 hours.

Recycling Stats

June 2012

How using recycled paper towel reduces waste

If every household in the US replaced just one roll of 180-sheet virgin-fiber paper towels with 100-percent recycled paper towels, it would save:

- 1.4 million trees
- 3.7 million cubic feet of landfill space
- 526 million gallons of water
- 89,400 pounds of pollution

Taken from "The Environment Equation" Alex Shimo-Barry with Christopher J. Maron

Let's do our part and REDUCE, REUSE and RECYCLE!

# Represents Pounds Recycled of each product	June 2012	May 2012
Cardboard	895	1270
Plastic	645	1085
Newspaper	150	140
Office Waste	135	125
Tin	43	60
Aluminum	70	105
