### Thanksgiving Goodies for Dogs and Cats

Our pets know how to work us and tug on our heartstrings. It's hard to resist those wide eyes and that soft whine or a dog who sits up and begs at the Thanksgiving table plaintively. Cats know how to earn sympathy (and handouts) too. They weave around the table legs and make hungry mews when they smell the turkey being carved.

Unfortunately, too much human food is bad for pets. Once they learn to beg, they risk obesity if we give in and feed them at the table regularly. Also, some of the spices and other ingredients in Thanksgiving dishes could make your dog or cat sick.

You might say, "But it's a holiday! Surely a little bit of turkey won't hurt." That's true, but your dog or cat won't forget that you gave in once and will try tomorrow...and the next day...and the next.

Instead of sharing part of the human Thanksgiving feast with your pet, serve up special goodies meant for dogs and cats instead. This list has several ideas for keeping canines and felines occupied while you and your family enjoy your holiday dinner.

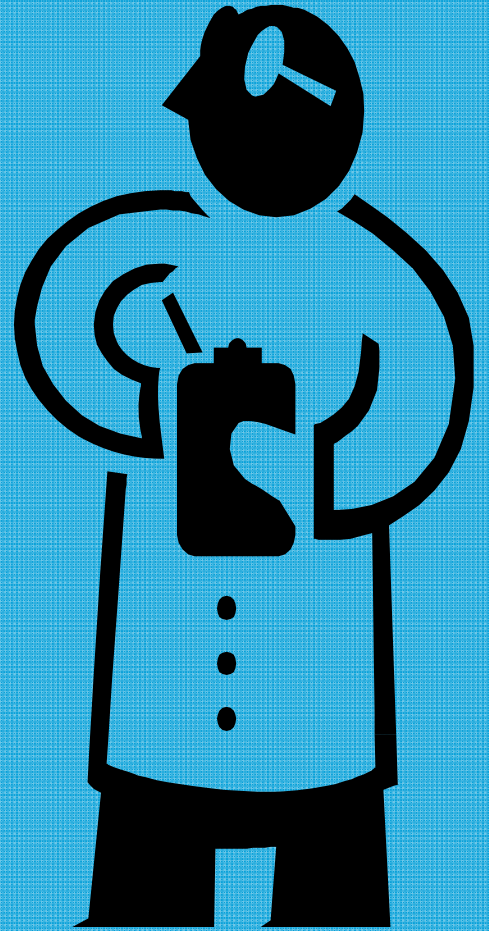

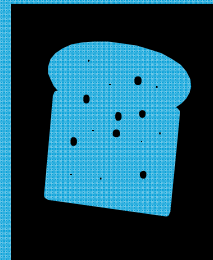

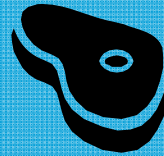

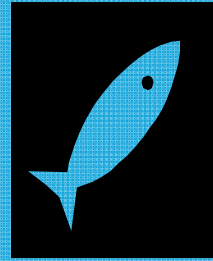

- Kong Treat Dispenser Dog Toys
- Nylabone Dog Chews
- Low Calorie Dog Treats
- Cat Treats
- Catnip Toys
- Pet Grass

FOOD ALLERGENS: The number of people in the United States with food allergies is increasing. A food allergy is the body's negative reaction to a food protein. There are specific signs that a person is having an allergic reaction. The following symptoms are associated with an allergic reaction to food: Itching in and around the mouth, face, or scalp. Tightening in the throat. Wheezing or shortness of breath. Hives. Swelling of the face, eyes, hands, or feet. Abdominal cramps, vomiting, or diarrhea. Loss of consciousness. Death. (2008 National Restaurant Association Solutions, ServSafe Essentials)

### Mosquito Fast Facts

1. In the interest of science, Arctic researchers uncovered their chests, arms, and legs and reported as many as 9000 mosquito bites per person, per minute. At this rate, and unprotected human would lose one half of his blood supply in approximately 2 hours.
2. Some people are more attractive to mosquitoes than others. It is not clear why, but probably has something to do with the 300 odd chemicals produced by the skin.
3. A mosquito can smell the carbon dioxide you exhale from about 60 to 75 feet away.
4. Most mosquitoes do not fly very far from their larval habitat, but the salt marsh mosquito migrates 75 to 100 miles over the course of its life.
