Happy New Year!

In the interest of your pet's health and safety, take a moment to review all documents regarding vaccinations, and registrations.

Is your pet microchipped? If so, ensure that the information is up to date with your chip provider. Do you know the microchip identification number? Contact the facility that inserted the microchip to obtain the information. How many phone numbers are on the list of information, and how many are valid cell phone numbers? A common error is pet owners listing a home phone number, and no one is home!

Contact your veterinarian's office to confirm the expiration dates of your pet's vaccinations. If any vaccinations expire in 2014, set up an appointment to have the renewal vaccination administered.

## **Recycling Stats December 2013**

Recycle Gift Cards

Gift cards made from the toxic plastic PVC are used all over the place, and are now filling up our landfill. It is time that more people recycled them. Refill gift cards if possible. Look for gift cards made from biodegradable materials such as corn. Support businesses that use these eco-friendly, green gift cards.

Mosquito concerns	1	o	3
Training for Spraying	2	O	2
Work done in chemical room	4	3	6
Totals:	83	49	159

## **Mosquito Fast Facts**

- 1. In the interest of science, Arctic researchers uncovered their chests, arms, and legs and reported as many as 9000 mosquito bites per person, per minute. At this rate, and unprotected human would lose one half of his blood supply in approximately 2 hours.
- 2. Some people are more attractive to mosquitoes than others. It is not clear why, but probably has something to do with the 300 odd chemicals produced by the skin.
- 3. A mosquito can smell the carbon dioxide you exhale from about 60 to 75 feet away.
- 4. Most mosquitoes do not fly very far from their larval habitat, but the salt marsh mosquito migrates 75 to 100 miles over the course of its life.
