Valentine's Day Safety Reminders

•All species of lily are potentially fatal to cats. Symptoms of lily ingestion in cats can be stomach upset, vomiting, or diarrhea.

•Thorns on roses or other flowers can be dangerous for dogs or other pets. Biting, stepping on or swallowing stems with thorns increases risk for a puncture, which can result in serious infections internally or externally.

•Chocolate is toxic to dogs and cats. The darker the chocolate, the more toxic, but dark, milk, semi-sweet and baker's chocolates all can cause adverse reactions. Darker chocolates contain caffeine-like stimulants that cause gastrointestinal, neurologic, and cardiac functions that can cause vomiting/diarrhea, hyperactivity, seizures and elevated heart rate. High fat in lighter chocolates can cause life-threatening inflammation of the pancreas, so make sure to keep the chocolate where pets can't reach it.

•Cocktails also pose a threat to pets. Because of their smaller size, even a small amount of alcohol stolen from a low-sitting glass or lapped off the floor after a spill can cause dramatic problems like vomiting/diarrhea, lack of coordination, central nervous system depression, tremors, difficulty breathing, and even coma.

If you think your pet has been poisoned, contact the Pet Poison Helpline at 1-800-213-6680.

Recycling Stats January 2014

Your loved one isn't the only one who deserves something special on Valentine's Day. Give a gift to the earth too by not throwing out your valentines! Reuse them instead!

Candy Boxes

- *Use for gift wrapping ties, scarves and gloves.*
- *Square candy boxes can be used for wrapping gifts, storing art supplies or carrying cross-stitch work.*
- *Save love letters in heart-shaped boxes.*
- *Fill with homemade candy.*
- *Make into a Valentine's Day card for next year.*
- *Cut a heart-shaped box so that you have a flat heart. Save and let the kids use it as a template.*
- *Make a Valentine's Day decoration for next year.*
- *Make a Picture Frame.*
- *Cut and use for index cards.*
- *Use a smaller box for storing paperclips, rubber bands, etc.*
- *Use as a decorative change holder for your dresser.*

# Represents Pounds Recycled of each product	January 2014	December 2013

Landing Rate Counts	0	0	5
Mosquito concerns	0	1	0
Training for Spraying	12	2	3
Work done in chemical room	3	4	2
Totals :	183	83	110

Mosquito Fast Facts

1. In the interest of science, Arctic researchers uncovered their chests, arms, and legs and reported as many as 9000 mosquito bites per person, per minute. At this rate, and unprotected human would lose one half of his blood supply in approximately 2 hours.
2. Some people are more attractive to mosquitoes than others. It is not clear why, but probably has something to do with the 300 odd chemicals produced by the skin.
3. A mosquito can smell the carbon dioxide you exhale from about 60 to 75 feet away.
4. Most mosquitoes do not fly very far from their larval habitat, but the salt marsh mosquito migrates 75 to 100 miles over the course of its life.

Single-use gloves can help keep food safe by creating a barrier between hands and food. But NEVER use gloves in place of hand washing. Hands must be washed before putting on gloves and when changing to a new pair. (Servsafe Essentials, Fifth Edition, 2008)
