Recycling Stats July 2014

What is better for our environment:

- A) Recycling
- B) Reusing materials
- C) Reducing the consumption of material that will end up in landfills or our waterways
- D) Selling off everything you own and living off the land like the pioneers of the Old West

Okay, option D is far fetched, but you can never go wrong with the **THREE R's!** We have been promoting recycling and have had a response so great, that our 16 bins are filled to capacity every week! Let's not forget that reusing materials and reducing our consumption will stretch our efforts even further!

Mosquito Fast Facts

1. In the interest of science, Arctic researchers uncovered their chests, arms, and legs and reported as many as 9000 mosquito bites per person, per minute. At this rate, and unprotected human would lose one half of his blood supply in approximately 2 hours.
2. Some people are more attractive to mosquitoes than others. It is not clear why, but probably has something to do with the 300 odd chemicals produced by the skin.
3. A mosquito can smell the carbon dioxide you exhale from about 60 to 75 feet away.
4. Most mosquitoes do not fly very far from their larval habitat, but the salt marsh mosquito migrates 75 to 100 miles over the course of its life.
