If such delay causes an increase in the cost of the work under the Agreement, the City and the Firm shall negotiate an equitable adjustment for costs incurred by the Firm in the Agreement price and execute an amendment to the Agreement. The Firm must assert its right to an adjustment within ten (10) calendar days from the date of receipt of the notice of delay. The notice shall state the nature of the dispute and list the party's specific reasons for such dispute. Within ten (10) business days of receipt of the notice, both parties shall make a good faith effort, in person or through generally accepted means, to resolve any claim, dispute, breach or other matter in question that may arise out of, or in connection with, this Agreement. P. FORCE MAJEURE

Neither party shall be liable for any default or delay in the performance of its obligations under this Agreement if, while and to the extent such default or delay is caused by acts of God, fire, riots, civil commotion, labor disruptions, sabotage, sovereign conduct, or any other cause beyond reasonable control. In the event of default or delay in performance due to any of the foregoing causes, then the time for completion of the services will be extended; provided, however, in such an event, a conference will be held within three (3) business days to establish a mutually agreeable period of time reasonably necessary to overcome the effect of such failure to perform.

R. GRATUITIES

The City may, by written notice to the Firm, cancel the Agreement without liability if it is determined by the City that gratuities were offered or given by the Firm or any agent or representative of the Firm to any officer or employee of the City with the intent of securing the Agreement or securing favorable treatment with respect to awarding or amending or the making of any determinations with respect to performance of the Agreement. V. INSURANCE REQUIREMENTS

Upon request, Firm shall provide a copy of its insurance policies to the City.

W. INTERPRETATION

The Agreement is intended by both parties as the final, complete and exclusive statement of the terms of their Agreement. No course of prior dealing between the parties or course of performance or usage of the trade shall be relevant to supplement or explain any term used in the Agreement. Although the Agreement may have been substantially drafted by one party, it is the intent of the parties that all provisions be construed in a manner fair to both parties, reading no provision more strictly against one party of the other. Whenever a term defined by the Uniform Commercial Code (the "UCC"), as enacted by the State of Texas, is used in the Agreement, the UCC definition shall control unless otherwise defined in the Agreement.

X. INVALIDITY

The invalidity, illegality or unenforceability of any provision of the Agreement shall in no way affect the validity or enforceability of any other portion or provision of the Agreement. The parties further agree to reform the Agreement to replace the stricken provision with a valid provision that comes as close as possible to the intent of the stricken provision. Firm assumes full responsibility for the terms contained herein and hereby releases, relinquishes, and discharges the City, its officers, agents and employees from all claims, demands and causes of action of any nature including the cost of defense thereof, for any injury to, including death of, any person whether that person be a third party, supplier or an employee of either of the parties hereto, and any loss of or damage to property, whether the same be that of either of the parties, caused by or alleged to have been caused by, arising out of or in connection with the issuance of the Agreement to the Firm and the negligence of the Firm, whether or not said claims, demands and causes of action in whole or in part are covered by insurance. Construction Plans & Specifications Instructions

Introduction to Construction Plans & Specification Methods

The procurement methods, plans, specifications, and related construction documents must be reviewed by Recreation Grants Staff prior to receiving a notice to proceed. All sponsors of local park grant projects must follow the Local Government Code of the State of Texas, plus any local rules, policies, ordinances, or regulations that are more restrictive than the state code.

Typical methods of construction include:

- Contract bid construction
- In-house construction:
 - o Force account construction
 - o Construction by donation
- Turnkey purchases and installation:
 - o Local government purchasing cooperative
 - o Small procurements
- In rare cases:
 - o Construction manager-agent
 - o Design build
- A combination of methods

If you use more than one method of construction, you will need to follow all required steps for each method.

The [Texas Municipal League](#) publishes two papers that can be used as a reference in navigating relevant portions of State Code when selecting and administering construction and procurement methods:

- [Municipal Procurement Made Easy](#)
- [Design-Build Handbook](#)

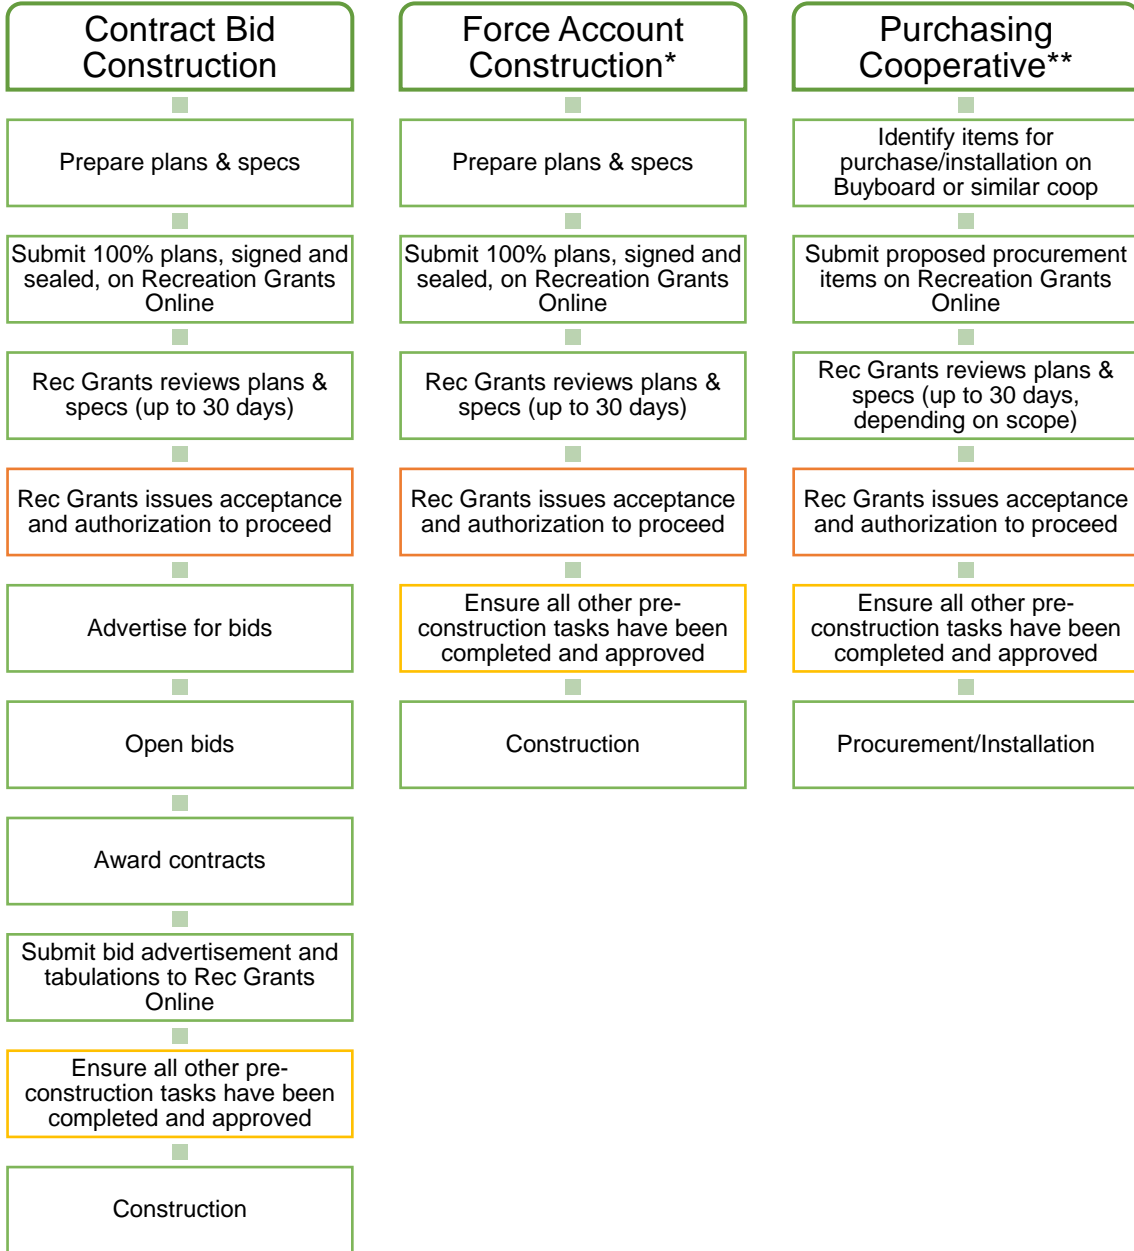

Before proceeding to construction or installation of small items, every project sponsor is responsible for ensuring that all pre-construction tasks have been submitted to Recreation Grants Online and reviewed and accepted by Recreation Grants Staff. Typical pre-construction tasks include appraisals and acquisition, environmental permitting, interlocal agreements, cultural resource permitting and clearance, registration and compliance with TDLR. Some tasks, such as a TCEQ Stormwater PPP, may be included in a construction contractor's scope of work and can be submitted after awarding contract.

Note: *No construction at the site may be initiated until 1) the grant agreement is active and executed, 2) the pre-construction tasks have been completed, 3) the plans and specifications have been accepted by Recreation Grants Staff. Beginning construction before these steps may jeopardize your funding.*

Construction Plans & Specifications Instructions

Construction Plans & Specifications Approval Flow

*Construction by donation follows same flow as force account

**Small procurement follows same flow as purchasing cooperative

Construction Plans & Specifications Instructions

Design/Development Instructions

The Recreation Grants Staff reviews all plans and specifications. Plans and specifications must be uploaded on our Online Grants Management System at: <https://tpwd-recgrants.intelligrants.com/login2.aspx>

100% Signed and Sealed Plans: Plans and specifications must bear the registration seal and signature of the designer, who is reminded that ethically their seal should appear only on documents for which they are personally responsible for and technically proficient. Plans may be developed by a licensed architect, landscape architect, or engineer.

All plans and specifications must be accepted by the Department prior to awarding of the construction contract, or if by force account, the construction of the elements. Staff primarily reviews construction plans and specifications to ensure compliance with the scope of work as set out in the grant agreement. Further design consultation is available upon request.

Pre-Construction Tasks: Permits or letters of approval must be uploaded, processed, and approved before construction plans and specifications can be accepted. Examples: Army Corps of Engineers evaluation and permit, U.S. Fish & Wildlife survey and permit.

Overmatch in Bid Proposals: Bid proposals must identify costs of any portion of the work not supported by Fund assistance. These costs must be easily separated for audit purposes.

Local Purchasing Cooperative: Recreation Grants staff may require plans and specifications for items purchased through a local purchasing cooperative such as Buyboard depending on the size, scope, and intensity of the items procured.

Each item selected through a local purchasing cooperative must be submitted to Recreation Grants staff for review and acceptance before it is purchased. All documentation from the cooperative must be included. All quotes from vendors must clearly state the cooperative contract number. Recreation Grants staff must be able to determine that the vendor selection process was achieved through the purchasing cooperative. Providing evidence of the vendor's registration on the cooperative is not enough to warrant acceptance by Recreation Grants staff.

Small Purchases: Plans and specifications are not required on items such as playground equipment, picnic tables, and benches to be purchased when the invoice amount is \$50,000 or less. However, information for small purchases must be submitted through Recreation Grants Online for approval.

Required information includes manufacturer's name, model number, as well as any relevant information required by the grant agreement scope, such as material composition. Tear sheets or other manufacturer documentation is the preferred submission item.

Installation Plans for Local Purchasing Cooperatives and Small Purchases: Each park construction project needs to provide construction plans and specifications that can be

Construction Plans & Specifications Instructions

registered with the Texas Division of Licensing and Registration and reviewed for accessibility requirements. This is required for all projects, even those that may not include contractor bid or force account construction. In addition, Recreation Grants staff needs to understand where elements are to be installed and how they will work in context of the overall project. Construction elements involving water or other sensitive resources may require more detailed documentation.

Detailed Definitions of Construction Methods

CONTRACT BID CONSTRUCTION

Political subdivisions must comply with the Local Government Code Chapters 252, 262, and 375 requirements governing advertisement of bids. It is the responsibility of the sponsor to adhere to all local, state, and federal laws and regulations regarding bidding procedures.

These procedures generally require award of a construction contract to the lowest qualified bidder. If applicable, the sponsor must submit written justification as to why the contract should not be awarded to the lowest bidder; the Department must concur with the justification.

The Department requires that a copy of the bid advertisement and the tabulation of all bids received before reimbursing any contract expenditures. Executed contract change orders relating to construction of grant elements must be forwarded to the Department for review.

Sponsors of funded projects must, at minimum, follow these purchasing requirements:

Expenditure Amount	Requirement
\$50,000 or less	May award to vendor of choice
\$50,000.01 or more	Formal bids required

It is the responsibility of the sponsor to determine if local codes or regulations require formal bids at a lower price point.

It is the responsibility of the sponsor to manage the formal bid process according to the stipulations provided in the Local Government Code and local regulations.

Multiple purchasing or phased purchasing to avoid the bidding process is specifically prohibited by the Local Government Code. For example, purchasing \$60,000 worth of material in two \$30,000 lots to avoid soliciting bids as required above is not allowed.

FORCE ACCOUNT CONSTRUCTION

Construction performed by the sponsor's own work force including work provided by other governments must be recorded and certified on work record forms.

Fringe benefits paid by the sponsor such as FICA, insurance, and retirement, are allowable expenses, but the method of determination must be documented. Fringe benefits may be

Construction Plans & Specifications Instructions

computed on a percentage of total payroll, provided the method of determination is approved. The sponsor's payroll records may be verified at the final audit/inspection.

CONSTRUCTION BY DONATION

The value of donations may be used only to meet cost sharing or matching requirements. The Department must be assured that the donation is at actual cost. The sponsor may not make a profit from any donation claimed on the grant.

Labor or Services: Donated labor or services will be recognized for matching purposes at the local common laborer wage, minimum wage or wage the sponsor pays that type of employee or service.

Volunteer labor is valued at minimum wage unless an individual is donating labor or services in their trade such as an electrician, brick layer, carpenter, etc. In that case, reimbursement will be based on the prevailing wage paid in the locality for that specialized trade. The "Certification of Donated Labor or Service" form must be completed and submitted with a signed force account work record.

The force account work record form may be used for documenting donated labor provided the individual donating the labor or service certifies by signature that the hours worked are correct. The sponsor's project officer or supervisor is also required to certify the work record.

Labor performed by individuals from correctional institutions must be documented in writing by an officer of the correctional institution.

Materials: Donated materials will be recognized for matching purposes at the actual cost or at the normal price charged by a vendor. All vendors donating materials must submit an invoice and a signed letter stating that they are making a donation and that the invoiced amount is the actual price of goods or services normally charged all customers.

Equipment: Donated equipment use will be recognized for matching purposes at rates established by the Department, providing that the firm is not in the equipment rental business. If equipment is donated from a rental agency, the donor must submit an invoice and signed letter stating that the invoiced amount is the normal price charged all customers.

LOCAL GOVERNMENT PURCHASING COOPERATIVE

The Local Government Purchasing Cooperative is an administrative agency created in accordance with Texas Government Code Chapter 791 (Inter-local Cooperation Contracts):

"A local government that purchases goods and services under this section satisfies the requirement of the local government to seek competitive bids for the purchase of the goods and services."

Construction Plans & Specifications Instructions

Its purpose is to obtain the benefits and efficiencies that can accrue to members or a cooperative, to comply with state bidding requirements, and to identify qualified vendors of commodities, goods, and services. Membership is free and open to all local governments, non-profits, and other political subdivisions of the state of Texas.

United States Army Corp of Engineer: Section 404 Permitting Guidelines:

Section 404 of the Clean Water Act:

Section 404 of the Clean Water Act (CWA) establishes a program to regulate the discharge of dredged or fill material into waters of the United States, including wetlands. Activities in waters of the United States regulated under this program include fill for development, water resource projects (such as dams and levees), infrastructure development (such as highways and airports) and mining projects. Section 404 requires a permit before dredged or fill material may be discharged into waters of the United States, unless the activity is exempt from Section 404 regulation (e.g., certain farming and forestry activities).

The basic premise of the program is that no discharge of dredged or fill material may be permitted if: (1) a practicable alternative exists that is less damaging to the aquatic environment or (2) the nation's waters would be significantly degraded. In other words, when you apply for a permit, you must first show that steps have been taken to avoid impacts to wetlands, streams and other aquatic resources; that potential impacts have been minimized; and that compensation will be provided for all remaining unavoidable impacts.

Proposed activities are regulated through a permit review process. An individual permit is required for potentially significant impacts. Individual permits are reviewed by the U.S. Army Corps of Engineers (USACE), which evaluates applications under a public interest review, as well as the environmental criteria set forth in the CWA Section 404(b)(1) Guidelines, regulations promulgated by EPA. Some states have assumed this permitting authority and regulate these activities.

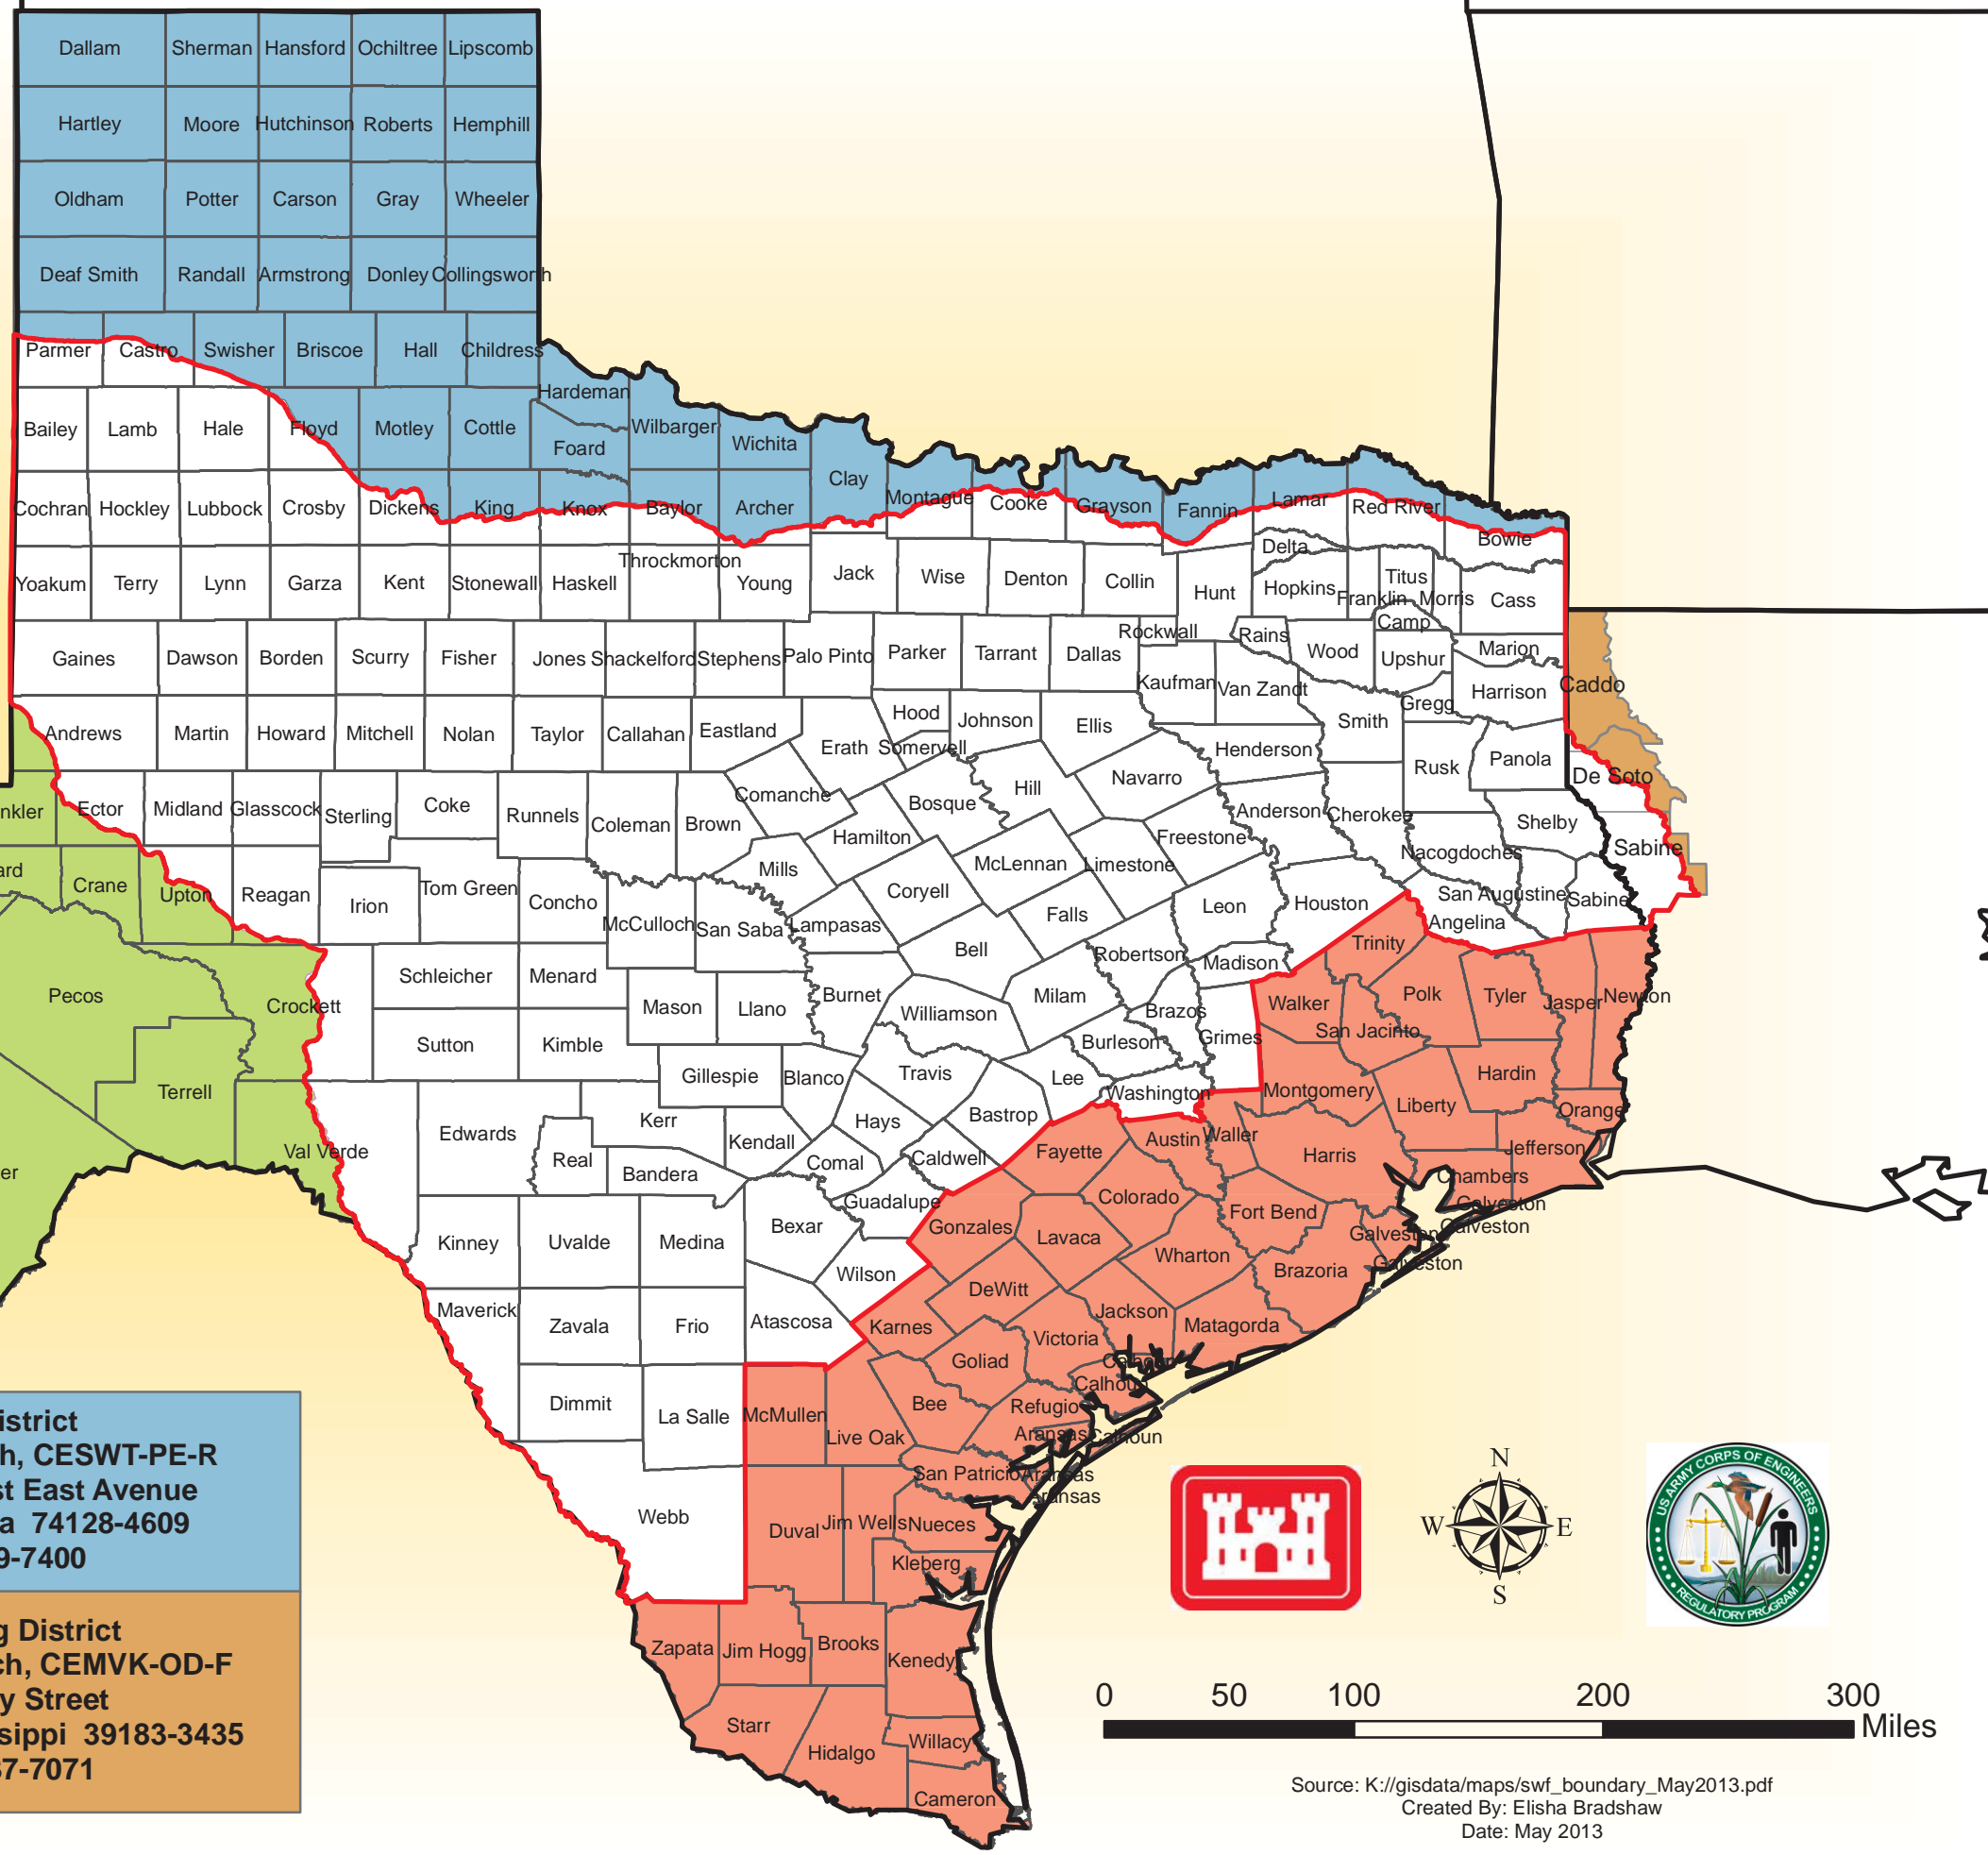

For most discharges that will have only minimal adverse effects, a general permit may be suitable. General permits are issued on a nationwide, regional, or state basis for particular categories of activities. The general permit process eliminates individual review and allows certain activities to proceed with little or no delay, provided that the general or specific conditions for the general permit are met. For example, minor road activities, utility line backfill, and bedding are activities that can be considered for a general permit. States also have a role in Section 404 decisions, through State program general permits, water quality certification, or program assumption.

Wetland Regulatory Authority

Regulatory Requirements

Section 404 of the Clean Water Act (CWA) establishes a program to regulate the discharge of dredged or fill material into waters of the United States, including wetlands. Activities in waters of the United States regulated under this program include fill for development, water resource projects (such as dams and levees), infrastructure development (such as highways and airports) and mining projects. Section 404 requires a permit before dredged or fill material may be discharged into waters of the United States, unless the activity is exempt from Section 404 regulation (e.g. certain farming and forestry activities).

Wetlands subject to Clean Water Act Section 404 are defined as "areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas."

The basic premise of the program is that no discharge of dredged or fill material may be permitted if: (1) a practicable alternative exists that is less damaging to the aquatic environment or (2) the nation's waters would be significantly degraded. In other words, when you apply for a permit, you must show that you have, to the extent practicable:

- Taken steps to avoid wetland impacts;
- Minimized potential impacts on wetlands; and
- Provided compensation for any remaining unavoidable impacts.

Proposed activities are regulated through a permit review process. An *individual permit* is required for potentially significant impacts. Individual permits are reviewed by the U.S. Army Corps of Engineers, which evaluates applications under a public interest review, as well as the environmental criteria set forth in the CWA Section 404(b)(1) Guidelines. However, for most discharges that will have only minimal adverse effects, a *general permit* may be suitable. General permits are issued on a nationwide, regional, or State basis for particular categories of activities. The general permit process eliminates individual review and allows certain activities to proceed with little or no delay, provided that the general or specific conditions for the general permit are met. For example,

Striped bass

minor road activities, utility line backfill, and bedding are activities that can be considered for a general permit. States also have a role in Section 404 decisions, through State program general permits, water quality certification, or program assumption.

Agency Roles and Responsibilities

The roles and responsibilities of the Federal resource agencies differ in scope.

U.S. Army Corps of Engineers:

- Administers day-to-day program, including individual and general permit decisions;
- Conducts or verifies jurisdictional determinations;
- Develops policy and guidance; and
- Enforces Section 404 provisions.

U.S. Environmental Protection Agency:

- Develops and interprets policy, guidance and environmental criteria used in evaluating permit applications;
- Determines scope of geographic jurisdiction and applicability of exemptions;
- Approves and oversees State and Tribal assumption;
- Reviews and comments on individual permit applications;
- Has authority to prohibit, deny, or restrict the use of any defined area as a disposal site (Section 404(c));
- Can elevate specific cases (Section 404(q));
- Enforces Section 404 provisions.

U.S. Fish and Wildlife Service and National Marine Fisheries Service:

- Evaluates impacts on fish and wildlife of all new Federal projects and Federally permitted projects, including projects subject to the requirements of Section 404 (pursuant to the Fish and Wildlife Coordination Act); and
- Elevates specific cases or policy issues pursuant to Section 404(q).

Manual for Identifying Wetlands

The U.S. EPA and U.S. Army Corps of Engineers use the 1987 *Corps of Engineers Wetlands Delineation Manual* to identify wetlands for the CWA Section 404 permit program. The 1987 manual organizes the environmental characteristics of a potential wetland into three categories: soils, vegetation, and hydrology. The manual contains criteria for each category. Using

this approach, an area that meets all three criteria is considered a wetland.

Wetlands on Agricultural Lands

Farmers who own or manage wetlands are directly affected by two important Federal programs—Section 404 of the CWA and the Swampbuster provision of the Food Security Act. The Swampbuster provision withholds certain Federal farm program benefits from farmers who convert or modify wetlands. The U.S. EPA, U.S. Army Corps of Engineers, U.S. Department of Agriculture, and U.S. Fish and Wildlife Service have established procedures to ensure consistency between the programs. Many normal farming practices are exempt from Section 404.

Texas Department of Licensing and Regulation (TDLR): Elimination of Architectural Barriers

All Local Park Grant projects are required to comply with the Texas Accessibility Standards (TAS) established by the Texas Department of Licensing and Regulation (TDLR) under the Elimination of Architectural Barriers Act, Texas Government Code, Chapter 469 and Texas Occupations Code, Chapter 51.

To ensure compliance with these regulations, TPWD requires all funded applicants to register their project with the TDLR and submit their construction plans to a Registered Accessibility Specialist (RAS) for review. Once construction is complete, the RAS will conduct a site visit and file an inspection report.

BOATING ACCESS ENVIRONMENTAL COMPLIANCE REQUIREMENTS

Sponsor Responsibility. As part of a grant requirements, the sponsor must submit to the Department appropriate environmental documentation. The scope, content and objectivity of the document shall comply with NEPA, CEQ Regulations.

GRANT ELEMENT REQUIREMENTS as per U.S. Fish and Wildlife Service (FWS)

Design Standards

Boating access facilities should be attractive to the public and harmonious with the natural environment. In general, new development and improvements should be designed to avoid or minimize harm to the natural setting, accommodate the number and types of proposed uses, and be consistent with topographic limitations of the site. Emphasis should be given to public health, safety, the natural environment, barrier-free access, and the protection of recreational and community values of the area.

Facilities supported with State Boating Access Program funds should consist of a concrete ramp (each lane 12' to 15' wide), a parking area with at least 20 car-trailer spaces per launching lane (10' x 40' each), an access road, and necessary support facilities. Boat docks and parking lots must be designed and constructed in a barrier-free manner pursuant to state law, and overhead utility lines are prohibited in the fund-assisted project area. (NOTE: Overhead utilities which are in place prior to application submission will be evaluated during the pre-award site visit and sponsors will be advised if such utilities may remain, or if they must be buried/relocated)

Boat docks, parking lots, and restrooms must be designed and constructed for barrier-free access, and overhead utility lines are prohibited in the fund-assisted project area. (NOTE: Overhead utilities in place prior to application submission will be addressed during the pre-award site visit, and sponsors will be advised if such utilities may remain, or if they must be buried/relocated.)

Sponsors must comply with the [Local Government Code](#) for [municipalities](#) and [counties](#), the requirement governing advertising for bids by counties and cities. If a contract is to be awarded to anyone other than the lowest bidder, information must be furnished to the Department as to the reason the contract should not be awarded to the lowest bidder. (NOTE: It is the sponsor's responsibility to adhere to all local, state, and federal laws and regulations).

After the project is designed, sponsors must contact the U.S. Army Corps of Engineers (Corps) to determine which permits (if any) are needed. A Corps permit, or letter stating that a permit is not required, must be obtained before a grant contract is executed with the sponsor. To find out which Corp district has jurisdiction you're your project, please visit their website at: <http://www.swf.usace.army.mil/pubdata/enviro/regulatory/introduction/districtboundaries2feb52002.pdf>

- **Environmental Compliance.** Policy concerning the assessment of the environmental impact of federal and federally funded actions is contained in the National Environmental Policy Act of 1969 (NEPA) (Public Law 91-190, as amended; 82 Stat. 852, as amended; 42 U.S.C. 4321-4347).

All Boating Access Grant actions are subject to the provisions of NEPA and the Council on Environmental Quality Regulations for Implementing the Procedural Provisions of NEPA (CEQ Regulations 40 CFR 1500-1508).

- Section 7 Consultation – Endangered Species Act: Section 7 (a)(2) The Endangered Species Act (ESA) directs all Federal agencies to work to conserve endangered and threatened species and to use their authorities to further the purposes of the Act. Section 7 of the Act, called "Interagency

Cooperation," is the mechanism by which Federal agencies ensure the actions they take, including those they fund or authorize, do not jeopardize the existence of any listed species.

- National Environmental Policy Act (NEPA)
The National Environmental Policy Act (NEPA) of 1969 is one of the first and most significant pieces of environmental legislation enacted in the U.S. NEPA provides the basic national charter for protection of the environment. The law is intended to ensure that information regarding environmental effects of an agency's development proposal and alternative actions are available to inform agency decision makers and the public.

- Army Corps of Engineering (COE)
 - Nationwide Permit; or
 - Specific Location Permit
 - National Marine Fisheries Service (NMFS) Required for all coastal projects.

All projects that are considered "Coastal" **MUST** submit information regarding the National Marine Fisheries Service (NMFS) – Pile Driving Noise Assessment for SAJ-82 that addresses Sea Turtle and Smalltooth Sawfish to the US Army Corps of Engineering during the permitting process and adhere to all the special conditions during construction.

- IPAC Report
U.S. Fish and Wildlife Service online service to assist with the environmental review process into your project design. IPaC offers: (a) Endangered Species (b) Mapping of proposed improved site and (c) Report of Impact analysis
<https://ecos.fws.gov/ipac/>

- Environmental Assessments (EA).
An EA should cover the points listed below in sufficient detail to resolve the test of "major and significant" (CEQ Regulations, Section 1508.18 and 1508.27) and provide a basis for deciding whether to prepare an environmental impact statement (EIS) on the project. Such assessments generally need be no more than two or three pages in length, except when complex projects are involved.

An EA should not be prepared if the need for an EIS is self-evident.

Format and Content. Pertinent information of sufficient scope and depth must be provided in an EA to allow the Department to accurately ascertain the impact of the project and to determine whether an EIS is needed. Whenever possible, an environmental impact should be quantified. In all cases the level of activities involved should be given (number of trees to be removed, cubic yards of debris to be removed, and cubic yards of fill to be required, etc.). For projects with property rights outstanding, the environmental information must also explain how the sponsor plans to assure that the environment will not be affected significantly. An EA should cover the following points:

- (1) **Description of the Proposed Project.** This section should include a brief description of all elements of the project for which assistance is requested, and how the project elements will be carried out.

- (2) **Description of the Site and Environment.** The actual project site(s) and surrounding area(s) should be described in this section. Information regarding vegetation, topography, water resources, access, outstanding characteristics, existing structures and improvements, utilities and easements, surrounding land uses, current property ownership, etc., should be

addressed. If the project site(s) contain threatened or endangered species of flora or fauna, significant mineral values, unique geologic formations, unique animal or plant ecosystems, or cultural/archeological/historical sites, they should be addressed.

Illustrations, graphics, photographs, etc., regarding elements addressed in this section should be included.

- (3) Floodplain and Wetland Documentation. This documentation is only necessary if a project involves a floodplain or wetland area, pursuant to Executive Orders 11988 and 11990. There are no exemptions from this documentation.

The following documentation should be included in the EA:

- (a) Public Notification. The sponsor must inform the public that the project will be located in a floodplain/wetland area, and that the project will have certain environmental impacts on the floodplain/wetland area. A public hearing must be held to allow public comment, application materials and plans must be available for public review, and copies of the published notice and public comments must be included with the application for Boating Access assistance.

- (b) Supplemental Information to the EA. The following information on the floodplain or wetland area must be included:

- (1) The extent of direct and indirect impacts of the project on the floodplain/wetland area;
- (2) Measures to be taken to minimize harm to lives and property, and to the natural and beneficial floodplain/wetland values;
- (3) Alternative actions and locations considered in the event of an adverse impact of the project;
- (4) Assurances that all state, federal, and local floodplain/wetland regulations are being met;
- (5) A map delineating the floodplain/wetland area as it applies to the project.

- (4) Environmental Impacts of the Proposed Project. This section should identify effects, or impacts, which are anticipated to result from the proposed project. Short and long term impacts, plus off-site impacts on land uses, fish and wildlife, vegetation, geology, soils and mineral resources, air and water quality, water resources/hydrology, cultural resources, transportation and access to the site, consumption of energy resources, socio-economic effects, etc., should be considered and addressed. State whether impacts will be beneficial or adverse.

"Impacts" are defined as causing direct or indirect changes in the existing environment, whether beneficial or adverse, which are anticipated as a result of the proposed action or related future actions. To the extent appropriate, the document will discuss impacts of the action, including environmental damage which could be caused by users, upon the physical and biological environment as well as upon cultural, aesthetic, and socio-economic conditions. Elements of impacts which are unknown or only partially understood should be indicated.

- (5) Mitigating Measures for Adverse Impacts. Adverse impacts can have either short or long-term effects and should be so identified in this section. For those impacts considered "adverse" and caused as a result of the project, explain how they will be mitigated, eliminated or minimized. "Adverse" impacts which cannot be mitigated should be addressed in the next section.

- (6) Unavoidable Adverse Impacts. Adverse impacts which cannot be mitigated or eliminated should be addressed in this section. The effects should be weighed against the beneficial impacts of the project.

(7) Alternatives to the Project. This section will include a brief description of alternatives as required by NEPA Section 102(2)(E), which states:

Study, develop, and describe appropriate alternatives to recommend courses of action in any proposal which involves unresolved conflicts concerning alternative uses of available resources.

The environmental impacts of the proposal and the alternatives should be presented in comparative form and should define the issues, pros and cons, of a reasonable range of alternatives, and provide a clear basis for choice between them by the Department and the public.

(8) A listing of agencies and persons consulted.

C. Points to Keep in Mind:

- (1) Environmental documentation should be free of project justification and personal bias. The project should be justified elsewhere in the grant application.
- (2) Do not rely on generalities. Specific facts are essential. All statements and conclusions should be supported, and quantified where possible.
- (3) Use graphics to help explain the project.
- (4) Be concise, clear and to the point.
- (5) Adverse impacts should be addressed as fairly as beneficial impacts.

Finding of No Significant Impact (FONSI). If the Department, after reviewing the environmental assessment, determines that the proposed project will not have a significant effect on the quality of the human environment and that an EIS is therefore unnecessary, no further environmental documentation will be required from the sponsor.

Guidelines to Determine When an Environmental Impact Statement Should Be Prepared. The Department will require sufficient environmental data from the sponsor to prepare an EIS on a proposed Boating Access project deemed to be a major action having a significant impact on the physical, biological, and/or socio-economic environment of the project site and/or surrounding area. Cumulative impacts and/or subsequent actions must be considered in environmental data submitted.

A. Factors to Consider. The occurrence of one or more of the following factors indicates that an EIS may be needed:

- (1) Marshes, or wetlands, unique animal or plant ecosystems, lakes, streams, or marine areas are affected significantly.
- (2) The proposed project would or might result in major natural or physical changes, including interrelated social and economic changes and residential and land use changes, within the project area or its immediate environs.
- (3) An archeological or historical site identified as a State Archeological Landmark, or eligible for SAL listing would be subjected to significant adverse effects by the proposed project. The procedures to follow for such a site are covered in Chapter 650.4.
- (4) Highly controversial issues involving the environmental effects of the project exist or are expected.
- (5) The project site contains threatened or endangered species of flora or fauna, significant mineral values, or a unique geologic formation.
- (6) Actions which foreclose other beneficial uses of mineral, agricultural, timber, water, energy, or transportation resources critical to the nation's or a state's welfare.

The Department may determine that a proposed project, even though not involving any of the above factors, requires preparation of an EIS.

Adoption of Previous Statement.

In accordance with 40 CFR 1506.3, an EIS prepared for another grant program not administered by the Department may be adopted by the Department if adequate to meet the requirements of a proposed Boating Access action.

All pre-award professional cost that have been approved **MUST** be submitted for reimbursement no later than 90 days after the execution of the TPWD local grant agreement. If these cost have not been submitted within the 90 day period, these cost could be considered forfeited and deemed not eligible. FWS is now requiring financial activity on all grants within the first 90 day grant period

After the project is designed, sponsors must contact the U.S. Army Corps of Engineers (Corps) to determine which permits (if any) are needed. ***A Corps permit, or letter stating that a permit is not required, must be obtained before a grant contract is executed with the sponsor.*** To find out which Corp district has jurisdiction you're your project, please visit their website at: <http://www.swf.usace.army.mil/pubdata/enviro/regulatory/introduction/districtboundaries2feb52002.pdf>.

Funded projects must be reviewed by the Texas Historical Commission and Texas Parks & Wildlife Department to determine potential impacts to natural and cultural resources. ***Written clearances or permits must be obtained from each agency prior to initiating any construction activities. The sponsor will be responsible*** to submitted their project to the Texas Historical Commission for a cultural resource review and to TPWD resource staff for a natural resource review. If these reviews uncover sensitive resources at a proposed project site, the project applicant will immediately be notified as to the situation and what actions are necessary to mitigate the situation.

[eTRAC system | THC.Texas.gov - Texas Historical Commission](#)

The review by the Texas Historical Commission focuses primarily on whether the project will impact known archeological sites or if the site's location and character are likely to contain archeological deposits. If the site contains, or likely contains, archeological deposits, a field survey by a qualified archeologist is usually required.

The review by the TPWD resource staff focuses primarily on whether the project site has known existence of animal and/or plant species listed as threatened or endangered, or habitat to support such species. If this is the case, a field survey by a qualified biologist is required and the project's impact on the listed species is assessed. If the rare species is federally listed, the U.S. Fish and Wildlife Service must approve the project for it to proceed. If a site has not previously undergone natural and cultural resource survey, we recommend budgeting funds in the project proposal for surveys.

Applicants will be required to remedy all resource impact concerns prior to initiating work on the project. Sometimes a simple relocation of grant element can avoid sensitive areas will allow a project to proceed, in other cases the remedy is much more time consuming and costly. If the remedy costs are too great (over 15% of total project costs), the sponsors will have the following options: a) cover the costs of the mitigation overruns themselves or b) withdraw their application.
