### Staphylococcus aureus

Staphylococcus aureus (staph) is a type of bacteria that's commonly found on the skin, throats and nostrils of many healthy people and animals. Therefore, it usually doesn't cause illness unless it is transmitted to food products where it can multiply and produce harmful toxins. Staphylococcal food poisoning can cause many of the same symptoms as other foodborne illnesses, such as nausea, stomach cramps, vomiting or diarrhea. The bacteria can also be found in unpasteurized dairy products, salty foods such as ham and other sliced meats, or in foods that require no cooking, such as puddings, prepared salads or sandwiches. Staphylococcal toxins are heat resistant, which means they cannot be destroyed by cooking.

Sources: Foods that are made or come in contact with the hands and require no additional cooking are at highest risk, including: Salads, such as ham, egg, tuna, chicken, potato and macaroni  
Bakery products, such as cream-filled pastries, cream pies and chocolate éclairs  
Sandwiches

Prevention: Wash hands with soap and water, do not prepare or serve food if you have a nose or eye infection or if you have wounds or skin infections on your hands or wrists. Keep the kitchen area clean and keep food out of the danger zone by cooling foods immediately in wide, shallow containers and refrigerating them.

## Spring Break has arrived!

With the increase in vehicle traffic and population, it is important to keep a closer eye on your pet's safety and well-being.

If you see a pet left in a vehicle unattended, please report it. Spring weather feels great, but the cabin of a vehicle may become hot enough to cause irreversible effects on humans and pets.

While enjoying the beach, please take plenty of clean, cool water for your dog, along with a leash, shade and a some food or snacks. Playing on the beach is fun, but dogs get thirsty and require a cool brake.

If you decide to leave the pets alone for the day, leave plenty of toys, food and water available to the them. Dogs will often bark "at the air" or make a mess because they are bored.

Enjoy the cool, then hot, then cool weather!

NOTICE OF COMPLY ISSUED	14	13	27
WARNINGS ISSUED	1	1	2
CITATIONS ISSUED	0	0	2

The City of South Padre Island (SPI) is asking the community to show your love for the Island this Valentine's Day. The City has collaborated with Republic Services (aka Allied Waste) in promoting the "I Love SPI" Campaign, with the goal of getting residents involved with maintaining the Island's natural beauty by offering additional brush and bulky item pick-up services to the regular monthly service.

Between January 22<sup>nd</sup> and February 13<sup>th</sup>, residents may place brush and bulky items at the front of the property for collection without facing fines. Take advantage of this period of amnesty and clear your yard and house of unnecessary debris and items. Mow and trim around fences, concentrating on the back of the properties (utility easements). Trim your trees and plants to spruce up South Padre Island in preparation for the busy season. Your property and your home will be better protected from brush fires and other potential hazards.

### ZIKA Virus

Mosquitoes are more than just an itchy nuisance. They can also pass on diseases. One of those diseases is Zika.

#### WHAT IS ZIKA?

Zika is a disease caused by a virus. It's mainly spread to people by mosquitoes. When an infected mosquito bites you, it can pass on the virus and make you sick. Zika illness is usually very mild. You may get symptoms such as a rash, fever, red eyes or joint pain, which usually go away within a week. According to the Centers for Disease Control and Prevention, only about 20 percent of people who are infected with Zika will get sick. Zika virus is spread by a type of mosquito called Aedes. These kinds of mosquitoes also spread dengue and chikungunya.
