South Padre Island Sidewalk Improvements update

South Padre Island, TX, May 29, 2019: The City of South Padre Island's Sidewalk Stamped Concrete Improvements project started in late April 2019. The landscaping strips along Padre Boulevard are currently being replaced with stamped concrete.

In 2018, the sidewalks that included landscape faced challenges that pose many public safety issues. During construction, areas of Padre Boulevard will be reduced to one-lane and may congest traffic flowing north and south.

"The City is committed to repairing sidewalks and improving accessibility," said Randy Smith, Interim City manager. "We would like to thank the community for their patience and understanding while we continue to make progress on this project."

This is a grant-based project through the Texas Department of Transportation and will improve the sidewalk on both sides of Padre Boulevard from Park Road 100 to the Convention Centre, which is approximately 4.6 miles.
