# **AEP OPEN HOUSE**

Wednesday, October 9

5 p.m. - 7 p.m.

SPI Community Center 4501 Padre Blvd.

AEP Texas plans to prepare its power transmission system in the Port Isabel and South Padre Island area to better withstand adverse Gulf Coast weather through a \$51 million rehabilitation program. The project includes a rebuild of about 12 miles of 138-kilovolt transmission line.

The project also reduces the likelihood and duration of power outages, while supporting economic growth and the region's crucial tourism sector.

**Visit AEP's website for more information:**
