Capital Improvement Plan 2023-2027

CIP Advisory Committee:

Mayor: Patrick McNulty

Mayor Pro Tem: Kerry Schwartz Council Member: Rees Langston Council Member: Eva Jean Dalton

Council Member: Joe Ricco

Council Member: Ken Medders Jr.

General Summary

A Capital Improvement Program (CIP) is a multi-year plan that identifies and prioritizes projects related to public facilities and services. On November 3rd, 2009, the voters approved a home rule charter for South Padre Island. Section 5.09 of the charter requires that the City Manager annually prepare and submit to the City Council a five-year capital program (Capital Improvement Plan).

Section 5.09 further requires that the capital program (Capital Improvement Plan) include:

- 1. A clear general summary of its contents.
- 2. Identification of the long-term goals of the community as stated in the City's Comprehensive Plan.
- 3. A list of all capital improvements and other capital expenditures which are proposed to be undertaken during the fiscal years next ensuing, with appropriate information as to the necessity for each.
- 4. Cost estimates and recommended time schedules for each improvement or other capital expenditure.
- 5. Method of financing upon which each capital expenditure is to be reliant.
- 6. The estimated annual cost of operating and maintaining the facilities to be constructed or acquired.
- 7. A commentary on how the plan addresses the sustainability of the community and the region of which it is a part.
- 8. Methods to measure outcomes and performance of the capital plan related to the long-term goals of the community.

The Capital Improvement Plan must be submitted no later than the time of submission of the operating budget for the ensuing fiscal year which is on or before

sixty days prior to the beginning of each fiscal year (Home Rule Charter - Section 5.02).

Home Rule Charter - Section 5.10 requires that the City Council provide for a public hearing on the Capital Improvement Plan and shall give notice by publishing the general summary of the capital improvement program and a notice stating:

- 1. The times and places where copies of the capital program are available for inspection by the public.
- 2. The time and place, not less than two weeks after such publication, for a hearing on the capital program.

The City Council by resolution shall adopt the capital program with or without amendment after the public hearing and at the same time it adopts the ensuring fiscal year budget.

CIP Introduction

The City of South Padre Island Capital Improvement Plan (CIP) is a valuable part of the community planning process. The CIP links local infrastructure investments with comprehensive plan goals, land use ordinances and economic development efforts. The CIP bridges the gap between planning and spending, between the visions of the comprehensive plan and the fiscal realities of improving and expanding community facilities. The purpose of the Capital Improvement Plan (CIP) policy is to create a fair and consistent process outlining procedures for proposing, evaluating, and adopting capital projects creating long-term benefits.

Goals

1. Preserving public health, safety and welfare

Providing the basic services that ensure citizen health and safety is the fundamental responsibility of local government. Programs of regular facility maintenance upgrades and expansion of government services to meet minimum federal, state and local standards are essential to any community. The cumulative effect of deferring major maintenance expenditures and basic improvement of essential services is often an expensive series of stopgap measures that fail to address comprehensive, long-term needs.

2. Anticipating the demands of growth

When related to the comprehensive plan, the capital improvements programming process works to anticipate investments in community facilities which are needed to serve or shape the pattern of growth and development.

3. Supporting economic development

Communities having sound fiscal health and high-quality facilities and services are attractive to business and potential residents. New corporate investment and reinvestment in a community may be influenced by improvements that enhance the quality of life for the company management and their labor force. Private decisions that bring jobs to an area and new taxes to a community are based not only on availability of water and sewer, but also upon the quality of schools, public safety, recreation opportunities and many other services.

4. Developing a fair distribution of capital costs

The CIP process allows for public discussion of the preferred means of distributing capital costs not only over time, but also among users of the facilities to be financed. Some communities prefer to pay for capital costs out of current revenues and absorb a high but single year tax increase. Other communities prefer to establish annual appropriations to capital reserve accounts to save for future projects. Still others feel that construction should take place as needed, and be funded by debt, returned by both existing and future users of the facility. In some cases, user fees may be deemed more appropriate than property taxes. Federal or state funds may also be available to help finance specific projects. The CIP process can promote discussion of fairness in fiscal policy.

5. Avoiding undue tax increases

Capital improvements planning is a means of avoiding the unpleasant surprise of expensive projects generating large property tax increases. While cost impacts cannot always be precisely determined in advance, the CIP fosters discussion of the distribution of the tax burden of new capital expenditures over time. A corollary benefit of fiscal stability and sound community facility planning can result in an improved bond rating.

Definition

The CIP is a five-year planning document adopted annually by the City Council to plan for capital improvements related to the City's beach renourishment efforts, streets and drainage, parks and recreational amenities, and facilities infrastructure. The Capital Improvement Plan is not to be confused with the Capital Improvement Budget.

The Capital Improvement Budget is prepared each year in conjunction with the annual Operating Budget. It generally includes only those projects from the first year of the Capital Improvement Plan funded during the current year.

A capital project is defined as having a minimum cost of \$50,000 resulting in

- 1. Creation of a new fixed asset.
- 2. Enhancement to an existing fixed asset.

Typically, the life expectancy of a capital project is 20 years. Examples include construction or expansion of public buildings, the acquisition of land for public use, planning, and engineering costs and street construction.

CIP Development Process

The City Manager, or designee is responsible for coordinating the CIP process each year. Each Department Director will submit projects in a form and timeframe annually established by the City Manager. The City Council appointed a Capital Improvements Advisory Committee to prioritize and rank projects according to the criteria listed in Project Criteria Section. Citizens may submit capital projects for consideration electronically using the CIP Project Request Form available on the City's website: www.myspi.org. Forms will also be available in a written format in the lobby of City Hall at 4601 Padre Boulevard. Members of the public should forward all materials concerning their submission to the City Manager or designee to be incorporated into the CIP process.

Departments will include as part of their project proposal:

- A Project Description providing an overview and justification of the project. Requests should be made and include estimated linear, square feet, or other applicable measurements.
- In the Comprehensive Plan Section, each project submission must illustrate compliance with the Comprehensive Plan by linking the project to a specific goal or objective.
- 3. Under Fiscal, possible funding options must be identified including:
 - a. Operating Revenues
 - b. Reserves and/or Debt
 - c. Grants
 - d. Partnerships
 - e. Dedicated Fees
- 4. Proposed Schedule for design, bid, and construction.

- 5. Estimated **Operating Costs** The estimated annual cost of operating and maintaining the capital asset.
- 6. **Sustainability** Defines how the capital project contributes to the sustainability goals of the City.
- 7. Identification of Project Leader.
- 8. Complete **Notes** as necessary to explain the unique situations and circumstances pertaining to the project.

Additional information may be requested of the project by the City Manager/designee and/or members of the CIP Advisory Committee.

Project Criteria

The evaluation of proposed capital projects will be in accordance with the following criteria. Attachment A provides the criteria scorecard used in the evaluation process.

- Public Health and Safety Project improving the public health and safety of
 the community will be rated with highest priority. Projects must demonstrate
 the benefit provided to the community and possible risks from not completing
 the project. Compliance with state and federal mandates fall under this
 category. (25 points)
- 2. **Recreation and Aesthetics** Projects promoting recreational and aesthetic improvements opportunities for the City of South Padre Island citizens are considered priority. (10 points)
- 3. Funding Funding availability considerations are included when ranking projects. Grants and funding partnerships are considered first followed by operating revenues, fund balance, and debt. Fund balance may only be used to fund capital projects if the use of reserves will delay or eliminate a proposed bond issue and sufficient fund balance exists to provide necessary contingency reserves. Debt may be issued to fund non-continuous capital projects benefiting future citizens only after alternative funding sources are explored. (15 points)
- 4. **Economic Development/Tourism** Projects promoting desirable economic development and or enhancing tourism within the City shall be rated including but not limited to beach renourishment projects and the economic support of the convention and hotel industry. (20 points)
- 5. **Service and Operational Impact** The service category prioritizes projects including promotion of improved service delivery or reduction of increased maintenance costs including rehabilitating aging infrastructure. A cost-benefit analysis shall be done to weigh the impact of project rehabilitation to determine if the project will reduce future ongoing maintenance costs.

- Performance data will also be analyzed when considering projects related to improved service delivery. Future operation and maintenance expenses will be considered as part of this analysis. (10 points)
- 6. **Strategic Alignment** Projects will be evaluated to determine alignment with strategic priorities identified by the City Council and with strategic planning documents such as the Comprehensive Plan. (10 points)
- 7. **Sustainability** Projects designed with environmental impact consideration and creation of the smallest possible ecological footprint and produces the lowest quantity of pollution possible. In an effort to make the City of South Padre Island more sustainable, projects considered environmentally conscious and promote "sustainability thinking" will be awarded additional points through the sustainability criteria. (10 points)

CIP Amendment

Amendments to the CIP affecting the current fiscal year must be recommended by the City Manager and approved by the City Council through a document amendment. Amendments will be considered according to project scoring criteria as previously identified. Higher priority will be given to projects necessary for the public health and safety, desirable economic development, and funding availability.

<u>Calendar</u>

Date	Item
4/14/2023	Capital Improvement Plan forms and instructions will be posted on the City's website, distributed to staff and made available to the public.
5/8/2023	CIP project request forms are due back from the public and staff to the Director of Operations or designee.
6/6/2023	Draft CIP will be presented to City Council at the Budget Workshop.
7/13/2023	Publish a general summary of the CIP and note the time and places where copies of the CIP are available for public inspection.
7/27/2023	CIP will be officially submitted to the City Council.
8/16/2023	Conduct public hearing for discussion of 5 Year CIP.
8/16/2023	Consideration and action on approval of Resolution adopting the 5 Year CIP at the same time adopting the ensuing fiscal year budget.

	Project Description												
The City of South Padre Island, as a barrier island, is susceptible to storm surge, high tides, and sea level rise. For protection, the beach and dune system is the first line of defense against these challenges. The importance of fortifying this natural resource is crucial through not only beach renourishment but by planting native dune vegetation and by strategically placing sand fencing. This project will ensure that there is continuous access to the public beach but also will enhance and restore habitat for critical and endangered species, such as the Kemp's ridley sea turtle.

	Describe how the capital project contributes to the sustainability goals of the City.							
and	Dune restoration contributes to the sustainability goals of the City by preserving and enhancing our natural resources on South Padre Island. Without this project, and in conjunction with the beach renourishment project, the Island would be susceptible to flooding from high tides and major storm surges as well as infrastructure damages.							
	Methods for Me	asuı	ring(Outcomes	and Performance			
allov tides foras	This project's goal is to continually maintain our dune system by planting native dune vegetation and adding sand fencing to capture wind-driven sand which allows sediment to be retained within the City's beach/dune system. Dunes are critical natural, infrastructure that are the first defense against major storms, high tides, erosion, and sea level rise. Additional benefits include increasing the habitat for local wildlife, such as nesting habitat for the endangered Kemp's ridley and foraging habitat for the threatened Piping Plover. The measurable objective will be the additional sand captured to enhance the foredune and will also be the increased width of the dunes. Annual monitoring surveys takes place on the beach and is funded by the City and GLO.							
	Project Criteria	Yes	No	Points	Comments			
1	Project Criteria Does the project preserve or improve public health, safety and welfare or is this project a federal or state mandate?	Yes	No	Points 25	Comments The project will provide increased protection for the Island, residents, community, and structures. This is also listed as a Tier 1 project in the Texas General Land Office (GLO)'s Coastal Resiliency Master Plan.			

Sustainability

	Project Criteria	Yes	No	Points	Comments
3	Is funding currently available?	\boxtimes		15	Funding in FY 23/24 is available through the Coastal Management Program (Cycle 28), the National Fish and Wildlife Foundation, and the City's beach renourishment fund (Fund 81). Future funding proposals are being prepared by City staff through the GLO's CEPRA program.
4	Does this project support economic development and/or tourism?	\boxtimes		20	An established dune system with native vegetation and sand fencing keeps wind-driven sand in our system and helps to maintain our beach, which is our biggest tourism driver.
5	Does the project improve service delivery or reduce maintenance costs?	\boxtimes		10	By restoring our dune system, this will lower the maintenance cost for our Island's infrastructure. An established dune system will protect the community and structures from high tides and storm surge as this is our first defense against these factors.
6	Does this project align with the Comprehensive Plan Goals?	\boxtimes		10	Chapter 9 Goals: SL.A, SL.B, SL.F, SL.G, SL.P, SL.R, SL.S, SL.T, SL.W, SL.X, SL.BB, SL.CC
7	Does this project promote "sustainability" taking environmental impact into consideration?	\boxtimes		10	This project takes into account all environmental factors during implementation and will enhance the natural resources on South Padre Island.

			Project Description	1								
coastal natural resour	The Texas Coastal Management Program (CMP) is funded through the National Oceanic and Atmospheric Administration (NOAA) and focuses on the state's coastal natural resource areas. The program is managed by the Texas Land Commissioner. The Texas General Land Office awards approximately \$2.2 million annually in grants, reviews federal actions in the Texas coastal zone to ensure consistency with the goals and policies of the CMP, supports protection of natural habitats and wildlife, and provides baseline data on the health of Gulf waters.											
funding for projects ur run through 2023. Fur City was also notified proposals for Cycle 29 Accesses 1, 10, and 1	The City has successfully completed many access improvements and projects under previous CMP cycles. Currently, the City has successfully been awarded funding for projects under Cycles 26, 27, and 28. Improvements at Sea Island Circle, Beach Access #5, are being funded under Cycle 26 which is expected to run through 2023. Funding under Cycle 27 will help construct improvements at Fantasy Circle, Beach Access #22, and is expected to begin October 2022. The City was also notified of award for two projects in Cycle 28: dune restoration and Access 16 improvements (Neptune Circle). City staff has begun to work on proposals for Cycle 29. Proposal will include the following projects: funds to help with constructing amenities at Access 22, full engineering and design for Accesses 1, 10, and 12, and a Project of Special Merit (PSM) proposal to acquire land for critical dune conservation, public access/ecotourism, and an operations area. If awarded funding from Cycle 29, projects are expected to start in October 2024.

	Describe how the capital project contributes to the sustainability goals of the City.							
The	The Coastal Management Program allows the City to protect, restore, and responsibly develop our Island's coast and natural resources. The City is able to improve access and safety through the program while making environmentally conscious decisions.							
	Methods for Me	easu	ring	Outcomes	and Performance			
When awarded a project through the CMP, monthly progress reports are required throughout the granting period. The City keeps a record of all progress on current and future CMP projects. There is a continuous dialogue between City staff and the CMP team at the Texas General Land Office.								
	Project Criteria	Yes	No	Points	Comments			
1	Project Criteria Does the project preserve or improve public health, safety and welfare or is this project a federal or state mandate?	Yes	No	Points 25	Comments Through the CMP, the City is able to enhance public access to the beach and bay as well as enhance the natural resources on the Island. The CMP is funded through NOAA and implemented through the Texas General Land Office. All projects within the coastal zone are required to follow the CMP.			

Sustainability

	Project Criteria	Yes	No	Points	Comments
3	Is funding currently available?	\times		15	The GLO opens grant cycles up each year. Matching funds through Fund 60, 61, 62, and 81 are available.
4	Does this project support economic development and/or tourism?	\times		20	This project supports economic development by improving the Island's accesses and natural resources.
5	Does the project improve service delivery or reduce maintenance costs?	\times		10	Emergency and public access are improved by continually working to update the City's accesses and amenities. Updated structures decrease the maintenance over time.
6	Does this project align with the Comprehensive Plan Goals?	\boxtimes		10	Chapter 9 Goals: SL.F, SL.G, SL.J, SL.M, SL.O, SL.P, SL.R, SL.S, SL.T, SL.W, SL.X, SL.Y, SL.AA, SL.BB, SL.CC, SL.DD
7	Does this project promote "sustainability" taking environmental impact into consideration?	\times		10	All environmental factors are taken into consideration throughout project implementation. Mitigation is completed for any damages to the natural resources.

	Project Description										
		Department of Treasu ill add a free, public boa					ramp with associated nmodate truck and boat				
The City purchased land in June 2021 on the southern end of Laguna Boulevard. Funding through the Texas Parks and Wildlife Department's Boating Access rant was awarded to help partially fund the engineering and permitting services. The City procured LJA Engineering at the end of 2021 for these services. The nal designs are expected to be completed in 2023. Construction is estimated to begin once the final designs are complete and permits from all agencies have een obtained (2023). The grant close out date for the RESTORE Act is currently October 2024.

	Sustainability							
	Describe how the capital project contributes to the sustainability goals of the City.							
	This project contributes to the City's sustainability goals by providing much needed access to the bay. The Laguna Madre is one of six hypersaline lagoons in the world and this project will provide access and educational signage.							
	Methods for Me	asuı	ring	Outcomes	and Performance			
forw betv	RESTORE Act is a federally funded grant, which requires monthly, quarterly, and annual reporting to measure the outcomes and how the project is moving forward. Quarterly reporting is also a requirement under the City's Texas Parks and Wildlife Department Boating Access grant. Meetings are held regularly between City staff, the design team, and the adjacent property owner. Updates on how the project is moving forward are provided to the Shoreline Task Force and City Council when available.							
	Project Criteria	Yes	No	Points	Comments			
1	Does the project preserve or improve public health, safety and welfare or is this project a federal or state mandate?	\times		25	The project will improve public safety by alleviating traffic from the Polaris Street Boat Ramp. Currently, Polaris sees a high amount of traffic which impacts the surrounding area.			

Project Criteria		Yes	No	Points	Comments
3	Is funding currently available?	\boxtimes		15	Funding is through the RESTORE Act and Texas Parks and Wildlife Department's grant programs as well as the City's Hotel Occupancy Tax.
4	Does this project support economic development and/or tourism?	\boxtimes		20	This public boat ramp will attract visitors to the Island.
5	Does the project improve service delivery or reduce maintenance costs?	\times		10	The addition of a third public boat ramp within the City will alleviate boater traffic from the City's current ramps, primarily from Polaris which is the most used free ramp. Less traffic at the City's other ramps will reduce the long term maintenance costs on each.
6	Does this project align with the Comprehensive Plan Goals?	X		10	Chapter 9 Goals: SL.F, SL.G, SL.H, SL.I, SL.J, SL.K, SL.M, SL.O, SL.Z, SL.DD
7	Does this project promote "sustainability" taking environmental impact into consideration?	\boxtimes		10	All construction for this project will take environmental risks into account. Mitigation will be completed for any damages to the bay and wetlands.

			Project De	escription	1						
Tompkins Channel currently runs from the north side of the Queen Isabella Causeway, along the bayside of South Padre Island until it terminates near Sunset Drive. This project will work to dredge the main channel and look into the feasibility of extended the Channel north approximately 10,000 linear feet. It is a well-known fact that Tompkins Channel is a tremendous asset to the City and extending it northward by almost two miles will enable vessels to continue northward where future development is being planned. This will 'open up' the Convention Centre to potential fishing tournaments and therefore increase tourism for the Laguna Madre area. The City is currently working with HDR Engineering on the project. The maintenance dredging is something that will need to be monitored and occur approximately every 10 years. Back in 1988, Central Power and Light (CPL) installed an underwater electrical transmission line beneath the Laguna Madre to have redundancy in the electrical grid on South Padre Island. The existing overhead transmission line near the old Queen Isabella Causeway experiences numerous outages due to the corrosive											
environment and storn just south of the Conve	n-related damages. The ention Centre. 	Describe how the capital pro	oject	contr	ibutes to the	sustainability goals of the City.				
vis	The Tompkins Channel dredging and expansion contributes to the City's sustainability goals by allowing continued access to the Lower Laguna Madre for all visitors and community members. The project is environmentally conscious in that it will mitigate for equal or greater damages done to any seagrass habitat if needed.								
	Methods for Measuring Outcomes and Performance								
yea	The City is working with HDR and has received a maintenance plan for the Channel. This Plan details the shoaling rate and gives the City an idea of how many years the Channel should be maintained and dredged. The USACE permit for the dredging has also been obtained and the GLO lease renewal has been executed by the City. HDR's next phase of the project will finalize the engineering/dredging documents and bring us to the completion of the bidding portion.								
	Project Criteria	Yes	No	Points	Comments				
1	Does the project preserve or improve public health, safety and welfare or is this project a federal or state mandate?	\boxtimes		25	Dredging the Tompkins Channel will improve public safety by removing shoaled in material and prevent boaters from accidents.				
2	Does this project promote recreational and/or aesthetic improvements?	\boxtimes		10	This project promotes using the bay for fishing, kayaking, and more.				

	Project Criteria	Yes	No	Points	Comments
3	Is funding currently available?	\boxtimes		15	The engineering and permitting phases have current funding through the City's beach maintenance fund (Fund 60).
4	Does this project support economic development and/or tourism?	\boxtimes		20	This project supports bay recreational sports, which are a big draw to the Island.

City of South Padre Island Capital Improvement Plan 2023-2027								
	Sustainability							
	Describe how the capital project contributes to the sustainability goals of the City.							
leve env	I rise and prevent the lost of wetlands in the future. This project	would	d serv	e as environ	ing habitat and would help the area to stay at pace with relative sea mental restoration for the area and provide massive amounts of ences that are directly on the bay, but protect the Island as a whole			
	Methods for Me	easui	ring	Outcomes	and Performance			
Part of this project will incorporate a monitoring plan for the bay street endings, restoration, and living shoreline to show the progress. Over the last year and a half, the City has worked with the United States Geological Survey (USGS) through National Fish and Wildlife Foundation (NFWF) grant funding on data collection. The hope is to continue this collaboration and partnership so that data collection and monitoring of the project area can continue. Long term goals encompass increased ecology and biodiversity as well as decreased community risk. Drone footage over time will also be able to give us insight on the progress of this project.								
	Project Criteria	Yes	No	Points	Comments			

	Project Criteria		No	Points	Comments
1	Does the project preserve or improve public health, safety and welfare or is this project a federal or state mandate?	X		25	Implementation of this project will provide increased safety for the Island, residents, and structures from storms, erosion, and flooding. This is currently listed as a Tier 1 project in the Texas General Land Office's (GLO) Coastal Resiliency Master Plan.
2	Does this project promote recreational and/or aesthetic improvements?	\times		10	This project will increase marine habitat in the bay to promote fishing and improve the aesthetic looks on the City's bay side.

	Project Criteria			Points	Comments
3	Is funding currently available?		\boxtimes	0	
4	Does this project support economic development and/or tourism?	\boxtimes		20	Creates more protected habitats for birds and other species, which attracts birders and nature enthusiast.
5	Does the project improve service delivery or reduce maintenance costs?	\boxtimes		10	The addition of more green/natural infrastructure along the Island's bayside will help to reduce flooding which will decrease maintenance costs over time.
6	Does this project align with the Comprehensive Plan Goals?	\boxtimes		10	Chapter 9 Goals: SL.A, SL.B, SL.H, SL.Q, SL.R, SL.S, SL.T, SL.U, SL.W, SL.CC
7	Does this project promote "sustainability" taking environmental impact into consideration?	\boxtimes		10	This project will actually create a more sustainable bay side with the use of green infrastructure.

Capital Improvement Fian 2023-2021										
	Sustainability									
	Describe how the capital pro	oject	contr	ibutes to the	sustainability goals of the City.					
The improvement of this boat ramp will allow for more access to the Laguna Madre. This will allow for the enjoyment of the unique natural resources the Island has. The construction of the boat ramp will be done in a sustainable and environmentally friendly way. All permits and leases have been secured but will need to be maintained in the future (extensions) if the project were to move forward.										
Methods for Measuring Outcomes and Performance										
The final, engineering designs for this project were received. The project is shovel ready for construction.										
	Project Criteria	Yes	No	Points	Comments					
1	Does the project preserve or improve public health, safety and welfare or is this project a federal or state mandate?		\boxtimes	0						
2	Does this project promote recreational and/or aesthetic improvements?	\boxtimes		10	This project promotes access to the bay for recreational activities.					

Project Criteria			No	Points	Comments
3	Is funding currently available?		\boxtimes	0	
4	Does this project support economic development and/or tourism?	\boxtimes		20	This boat ramp is a free bay access point that attracts visitors to the Island.
5	Does the project improve service delivery or reduce maintenance costs?		\boxtimes	0	
6	Does this project align with the Comprehensive Plan Goals?	\boxtimes		10	Chapter 9 Goals: SL.I, SL.J, SL.M, SL.Z, SL.DD
7	Does this project promote "sustainability" taking environmental impact into consideration?	\times		10	Any damages from the construction of this project will be properly mitigated for. Environmental considerations have been taken into account while planning this project.

Project Leader/Dep	oartment: <u>C. Alejand</u>	ro Sanchez - Public Wor	rks Director/Pu	ıblic Works	Department				
Comprehensive Pl	an Goal: Chapter 6	& 10							
			Project De	escription	1				
Improve Laguna Boulevard from Palm Street to Morningside Drive adding curb and gutter to the west side of the street and drainage system to accommodate drainage flows. Improvement will also add a bike lane on the west side of the street. Currently the project is under construction and approximately 8% complete. The project is expected to be finalized by summer of 2025.

Prepared By: C. Alejandro Sanchez											
Date Prepared:	Date Prepared: 04/28/2023										
Project Leader/Dep	Project Leader/Department: C. Alejandro Sanchez - Public Works Director/Public Works Department										
Comprehensive Pla	Comprehensive Plan Goal:										
			Project Des	-							
Adequate street lighting provides better security for areas where pedestrians and vehicles may interact, and crime is more likely to occur in poorly lit areas. There are some people that feel that street lighting causes "light pollution" and interferes with nighttime activities like stargazing. Those beliefs need to be taken not consideration and balanced with the safety needs of the general public. Those existing lights that have identified as inadequate are being identified for upgrade to include more powerful and more efficient lighting as well as longer arms that will allow the light to be directed near the center of the street. This upgrade of the existing lighting will cost approximately \$600 per light.											
Total of 300 lights.	otal of 300 lights.

Project Title:	Street Lights - Option 3									
Prepared By:	By: C. Alejandro Sanchez									
Date Prepared:	ate Prepared: 04/28/2023									
Project Leader/Dep	Project Leader/Department: C. Alejandro Sanchez - Public Works Director/Public Works Department									
Comprehensive Pla	n Goal:									
			Project Description	n						
Adequate street lighting provides better security for areas where pedestrians and vehicles may interact, and crime is more likely to occur in poorly lit areas. There are some people that feel that street lighting causes "light pollution" and interferes with nighttime activities like stargazing. Those beliefs need to be taken into consideration and balanced with the safety needs of the general public. A possibility to consider regarding street lighting is replacing the fixtures with solar power. This option has an extremely high initial cost of more than \$10,000 per light and due to our highly corrosive environment; repair and maintenance costs are estimated at \$100 per light per year. This would include repair and/or replacement of the photo-voltaic panels and battery packs.

Comprehensive Pla	n Goal:	Chapter 7 PR.A Increase Facility Usage									
				Project De	scription	ı					
In December of 2002, the City Council purchased a 1.97-acre tract of land located at 6100 Padre Boulevard. The City obtained a grant from Texas Parks and Wildlife and has broken the project down into three phases. Phase one included a restroom facility, a pump house, basketball court, two playgrounds, parking lot and miscellaneous fencing and site improvements at a cost of \$703,433. Phase I was completed in 2016. Phase II included a walking/jogging track, exercise stations, benches, landscaping irrigation additional play equipment, picnic tables, a bocce ball Court, 2 sail shade structures, soccer goals and a skate park at a cost of \$638,000. Phase II was completed in July 2022. Phase III includes solar lighting throughout the park and a shade pavilion over the basketball court. In April of 2023 the City Council approved \$329,000 from excess reserves to complete Phase III.

			Project Des								
The City of South Padre Island has identified the city-owned property behind the future SPI Museum at 610 Padre Blvd. as the ideal sight for a Pickleball Park. Pickleball is one of the fasted growing sports in the United States. Pickleball is a paddle sport created for all ages and skill levels. Pickleball combines many elements of tennis, badminton and ping-pong. In April 2022 South Padre Island's City Council approved funding for Phase I of Pickleball Park to meet the needs and desires brought forth by the community. Phase I includes two Pickleball Court, an ADA ramp, and an ADA sidewalk. In March of 2023 City Council approved the design concept and \$150,000 budget amendment for Phase II to include 3 additional courts and an ADA bathroom.

CONVENTION CENTER EXPANSION PROJECT

The expansion of the South Padre Island Convention Center includes a new 380-seat theater, ballroom and kitchen, restrooms, boardrooms, and more! This would allow the centre to accommodate more concerts, performances, and other special events as the market continues to grow.

While the municipal hotel occupancy tax is the most important source of the Island's convention center funding, enhancing the facility would enhance the reputation as an attractive meeting venue and is projected to financially support the overall operating costs.

Over the years tourism has increased, yet the current state of the facility does not meet the demands of major state and regional conferences to other private facilities.

The current facility offers the following:

- Meeting Space 45,000 Square Feet
- Exhibit Hall 22,500 square feet
- Breakout Space 9,000 square feet
- 230 Seat Conference Hall
- Room for 130 Booths
- 9 Meeting Rooms

The Island has seen significant growth in conferences and conventions over the years. This expansion would allow the following:

- Accommodate larger groups and associations worldwide
- Accommodate multiple groups and amenities on the same day
- Provide suitable space for attendees
- Provide catering
- Economic growth to the local economy
- The market is highly competitive

By not moving forward with the SPI Convention Centre Expansion Project today, the local economy will suffer from the following:

- Decrease in tourism
- Decrease in the local economy
- Decrease in Meetings & Group
 Bookings
- Increase in operating losses
- Decrease in returning clients

COST

The expansion will consist of two phases with the estimated costs around \$105 Million. This will increase the total square footage from 44,500 thousand to over 100,000 square feet of meeting space.

- Phase 1: 380-seat Theater will cost approximately \$22.5
 Million
- Phase 2: Ballroom, Kitches, Bar, Deck, Bathrooms, and Meeting rooms will cost approximately \$83.4 Million.

Project Description												
aintaining and preserving access to the Laguna Madre is vital to South Padre Island. Presently, bay access is available but is very limited. Kite boarders, ayakers, and other personal watercraft users have few areas where they can launch their equipment from within the City limits. As South Padre Island grows urther north, making access available will become a priority for the City. Acquiring land by purchase, renting, and/or donation near the new causeway landing te will ensure access to the bay in the future. The City currently leases property just north of the Shores Subdivision on the bayside where the Wind and Water Sports Venue will be located. A silent water ports venue will be built to accommodate parking and a launch site for non-motorized watercraft. The City has been working with Hanson Professional Services are. (Hanson) on the design and permitting. Due to the property being primarily classified as wetlands, which falls under the United States Army Corps of angineers (USACE) jurisdiction, the permitting process has been strenuous. The City and Hanson have been in continuous contact with the USACE to come up ith a design that will be beneficial for all parties. A formal mitigation plan has been developed and is being reviewed by state and federal agencies.

	Sustainability									
	Describe how the capital project contributes to the sustainability goals of the City.									
Вус	Currently, the launch area that is utilized by the wind and water sport athletes is completely undeveloped and requires driving all over the marsh and wetlands. By developing this park, it will allow for the preservation and protection of the marsh, wetlands, and critical habitat for the piping plover by removing vehicular raffic.									
	Methods for Me	asuı	ring	Outcomes	and Performance					
	The project is currently in the design/permitting phase and has a project schedule to show when items are to be due to the City. Updates have been given at public meetings and continuous meetings between the City, property owners, engineers, and federal agencies occur to keep the project ongoing.									
	Project Criteria	Yes	No	Points	Comments					
1	Project Criteria Does the project preserve or improve public health, safety and welfare or is this project a federal or state mandate?	Yes	No	Points 25	Comments The project will work to preserve critical wetland habitats that are currently driven on and damaged daily. The preservation of this area will help to reduce inland flooding by allowing the wetlands to naturally grow.					

	Project Criteria	Yes	No	Points	Comments
3	Is funding currently available?	\boxtimes		15	The project is funded through the City's Venue Tax Fund.
4	Does this project support economic development and/or tourism?	\boxtimes		20	This park will be an amenity, attracting visitors to the Island.
5	Does the project improve service delivery or reduce maintenance costs?		\boxtimes	0	
6	Does this project align with the Comprehensive Plan Goals?	\times		10	Chapter 9 Goals: SL.G, SL.H, SL.J, SL.K, SL.M, SL.Q, SL.R, SL.U, SL.W, SL.Z, SL.CC, SL.DD
7	Does this project promote "sustainability" taking environmental impact into consideration?	\times		10	The driveway and parking will be made from a permeable surface to allow for appropriate drainage. The project will be constructed as minimal as possible to reduce the footprint. The bathroom will not require utility connections to reduce impacts even more.

Project Title:	<u> </u>	Parking Structure (Venue Tax Project)											
Prepared By:	(C. Alejandro Sanchez											
Date Prepared:	(04/28/2023											
Project Leader/Dep	artment: (C. Alejandro Sanchez - Public Works Director/Public Works Department											
Comprehensive Pla	n Goal: (Chapter 8											
				Project De	escription								
Creation of a parking facility serving the basic function of parking vehicles as well as designed to incorporate multi-use features including availability for residential and/or commercial development. The structure would facilitate visitors and/or residents' transition to and from their vehicles. Users of the facility need access to the beach benefiting local business and increase use of public transportation. The facility could also be a pick-up location for the City's free transportation system – Island Metro.

	Sustainability									
	Describe how the capital project contributes to the sustainability goals of the City.									
The	The parking structure would create more opportunities for residents and visitors to park, ride and walk to City Venues.									
	Methods for Measuring Outcomes and Performance									
Crea	ate a matrix for number of vehicles using the structure.									
	Project Criteria	Yes	No	Points	Comments					
1	Does the project preserve or improve public health, safety and welfare or is this project a federal or state mandate?	X		25	A central location for parking would improve the congestion of vehicles throughout city streets and would also satisfy the GLO's beach access requirements.					
2	Does this project promote recreational and/or aesthetic improvements?	\times		10	Takes vehicles off the street and provides an opportunity for visitors to use mass transit or walk to their desired location.					

	Project Criteria	Yes	No	Points	Comments
3	Is funding currently available?		\boxtimes	0	Venue Tax (Approved phase of venue tax project as funds become available.)
4	Does this project support economic development and/or tourism?	\boxtimes		20	Attracts more people by having more parking spaces available and promotes a more pedestrian friendly business environment.
5	Does the project improve service delivery or reduce maintenance costs?	\times		10	Provides an option to park at a romote location and with assistance of the transit system to transport to the beach acesses, wind and water sports park or convention centre.
6	Does this project align with the Comprehensive Plan Goals?	\boxtimes		10	Chapter 8
7	Does this project promote "sustainability" taking environmental impact into consideration?	\times		10	Incorporate green infrastructure to the building. In addition, it will reduce the number of vehicles in a specific time frame moving on South Padre Island, in turn reducing emissions.
